PROJECT NO. 56058

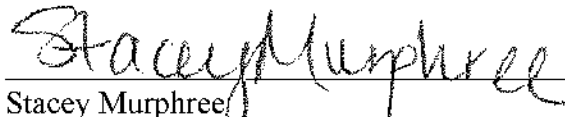

**SUMMARY REPORT OF §
SIGNIFICANT INTERRUPTIONS § PUBLIC UTILITY COMMISSION
LASTING MORE THAN § OF TEXAS
24 HOURS – CY 2024 §**

CENTERPOINT ENERGY HOUSTON ELECTRIC, LLC

SUMMARY REPORT

Pursuant to 16 Tex. Admin. Code § 25.52(e)(2) ("TAC"), CenterPoint Energy Houston Electric, LLC ("CenterPoint Houston") is providing the Public Utility Commission of Texas ("Commission") with its Storm Summary Report pertaining to a significant interruption resulting from storm activity that impacted CenterPoint Houston's service territory on May 16 – May 24, 2024.

Respectfully submitted,

Stacey Murphree
1111 Louisiana St., Suite 1924
Houston, Texas 77002
713-207-6537
713-207-9819 (fax)

CENTERPOINT ENERGY HOUSTON ELECTRIC, LLC

Public Utility Commission of Texas
Significant Interruption Summary Report

Utility Name: CenterPoint Energy Houston Electric, LLC (CNP)

Utility Contact: Stacey Murphree

Phone: 713-207-6537

Pursuant to PUC Substantive Rules, Section 25.52 (e)(2): Summary report. Within five working days after the end of a significant interruption lasting more than 24 hours, the utility shall submit a summary report to the commission. The summary report shall include:

1. Date and time of start of significant interruption

May 16, 2024 @ 4:57 p.m.

CNP defines the storm period as starting one hour before entering Trouble Level 2 or higher through one hour after returning to Trouble Level 1.

2. Date and time of end of significant interruption

May 24, 2024 @ 3:37 p.m.

CNP defines the storm period as starting one hour before entering Trouble Level 2 or higher through one hour after returning to Trouble Level 1.

3. Cause of the interruption

A weather event brought widespread severe weather, derecho storm conditions with windspeeds of up to 100 mph, Category 2 Hurricane-like winds, and two tornadoes into the Houston metro area. A derecho is defined by the National Oceanic and Atmospheric Administration as a line of intense, widespread, long-lived and fast-moving straight line wind storms and sometimes thunderstorms that moves across a relatively straight swath and is characterized by damaging winds similar to a tornado. Additionally, two EF1 tornados touched down in the Waller and Harris County portions of CNP's service area. These events caused widespread devastation to CNP transmission and distribution system including toppling of transmission towers, falling and broken distribution poles, equipment failures, extensive vegetation and debris damages, and prolonged outages.

4. Location, substation, and feeder identifiers of all affected facilities

Systemwide, the storm affected some or all customers on approximately 210 substations and 1,355 feeders. The CNP Service Areas that sustained significant outages were in the Bellaire, Spring Branch, Cypress and Greenspoint service areas resulting in substantial damage and outages for 698 feeders served from 90 substations.

5. Total number of customers affected

Approximately 1,227,346 non-distinct customers experienced some outage because of the weather event.

Note: For reporting purposes, the number of actual non-distinct customers is the total customers found experiencing an outage during the entirety of a storm or event. Therefore, it is possible a single customer could be counted multiple times for each loss of service they experience. By contrast, the number of customers experiencing an outage at the peak of an event (#6 below) is the total actual maximum distinct customers found experiencing an outage at a specific time during the storm. Both these numbers can vary from real-time estimated outage data available during an event and communicated publicly.

6. Dates, times, and approximate numbers of customers affected by partial or step restoration.

Date	Time	Customers With Sustained Outages
5/16/2024	17:00	0
5/16/2024	18:00	22,597
