AEP TEXAS INC.'S RESPONSE TO TEXAS INDUSTRIAL ENERGY CONSUMERS
FOURTH REQUEST FOR INFORMATION

Question No. TIEC 4-2:

Please reconcile the ERCOT 4CP demands at generation as provided in the Workbook “TEX ERCOT 4CP LR kW No Adjustments with BESS” (6,730,709 kW) with the amount shown in the Workbook TEX ALLFACT9_2023 Final” (6,726,455 kW) and the final published 2024 Net Wholesale Trans Matrix Charges for ERCOT in Docket No. 56050, which shows AEP’s 2023 Average 4CP of 6,846,544 kW.

Response No. TIEC 4-2:

The “TEX ERCOT 4CP LR kW No Adjustments with BESS” (6,730,709 kW) value is the sum of the classes’ 4CP average contributions.

The “TEX ALLFACT9_2023 Final” (6,726,455 kW) value is similarly calculated, but excludes BESS.

The 2024 Net Wholesale Trans Matrix Charges for ERCOT in Docket No. 56050 which shows an average 4CP of 6,846,544 kW is ERCOT's 4CP calculation. This value includes ERCOT estimations, loss factors, and Unaccounted For Energy (UFE) adjustments that cause it to vary from AEP Texas’s 4CP calculations.
