- k. WP – Street Light 2023 – ERRATA 23
- l. WP – Misc Light 2023 – ERRATA 23

**6. Specific Instructions - Hardcoded Numbers**

Certain numbers must be hardcoded to avoid circular references or other linking problems. If numbers are modified the user must make sure the following cells are manually updated in this order.

1. In CEHE RFP Schedule-Errata 23.xlsx, worksheet "II-F-2", update FF# 8 OMAGXFP(565) "Total O&M and A&G, excluding Fuel & Purchased Power" by copying the numbers from Excel columns K through N and pasting as values in Column Nos. 1 through 4.
2. In CEHE RFP Schedule-Errata 23.xlsx, worksheet "II-F", update FF# 6 TOTREV "Total Revenue Requirement" by copying the numbers from Excel columns K through N and pasting as values in Column Nos. 1 through 4. Copy as many times as needed until values are zero in columns in Q through T. Other changes below may require this to be repeated.
3. In CEHE RFP Workpapers TCOS Calculation-Errata 23.xlsx, update cell D12 by copying the value from CEHE RFP Schedules-Errata 23.xlsx, worksheet "III-A-1", Column No. 4, Line No. 12 "TOTAL ADJUSTED REVENUE REQUIREMENT" (cell G25). Copy and paste as values into cell D12.
4. In CEHE RFP Workpapers B-Errata 23.xlsx, worksheet "WP II-B-9", update cell C23 by copying the value from CEHE RFP Schedules-Errata 23.xlsx, worksheet "II-B", Column No. 3, Line No. 31 "Return on Rate Base" (cell F44). Copy and paste as values into cell C23.

Docket No. 56211

## Information and Instructions for Schedules and Workpapers

5. In CEHE RFP Workpapers B-Errata 23.xlsx, worksheet "WP III-B-9", update cell C23 by copying the value from CEHE RFP Schedules-Errata 23.xlsx, worksheet "III-B", Column No. 3, Line No. 29 "Return on Rate Base" (cell F42). Copy and paste as values into cell C23.

Repeat all steps until values in CEHE RFP Schedules-Errata 23.xlsx, worksheet "II-F-2 #8 and #6 are zero.

**EXECUTIVE SUMMARY – ACCOUNTING**

**(KRISTIE L. COLVIN)**

I sponsor the books and records of CenterPoint Energy Houston Electric, LLC (“CenterPoint Houston” or the “Company”), which have been prepared in accordance with the requirements of the Public Utility Commission of Texas (“Commission”). My testimony supports the Company’s cost of service for total transmission and distribution operations, including rate base. I sponsor the accounting schedules, and co-sponsor schedules related to affiliate expenses, salaries and benefits, and rate case expenses. I support the reasonableness and necessity of certain CenterPoint Energy Service Company, LLC (“Service Company”) Executive Management services, Accounting, and certain financial corporate support services. I also support the reasonableness and necessity of Financial Planning and Analysis (“FP&A”) and certain accounting transaction costs incurred directly by the Company.

My testimony and supporting materials:

- show the Company’s cost of service and rate base are reasonable and necessary;
- itemize and explain all test year adjustments to arrive at the final requested amounts reflected in my testimony, exhibits, and schedules;
- support an overall rate of return of 7.03% and return on investment of 850.3 851.2 \$~~850.8~~ million to be included in the cost of service;
- demonstrate the reasonableness and necessity of certain Service Company Executive Management functions, the FP&A organization, and the Chief Accounting Officer (“CAO”) organization services provided to CenterPoint Houston; and
- demonstrate the reasonableness and necessity of certain accounting transaction costs incurred directly by the Company.

components are described below and can be seen on Schedule II-B and Exhibit KLC-03. In addition, I address adjustments to rate base below, which are shown on Exhibit KLC-04a with explanations of the adjustments provided on Exhibit KLC-04b.

**A. Electric Plant in Service**

**Q. PLEASE DESCRIBE EPIS.**

A. EPIS is the capitalized expenditure for assets used and useful for the transmission and distribution of electricity within the Company's service territory. The Company utilizes the FERC USOA, which categorizes EPIS assets as having an expected life in service of more than one year from the date of installation in the primary areas: intangible plant, transmission, distribution and general plant. The RFP schedules combine intangible plant, transmission and distribution into one category as "Original Cost of Plant" and separate communications equipment out of general plant for presentation purposes.

**Q. WHAT ARE THE EPIS AMOUNTS INCLUDED IN THIS FILING?**

A. For the adjusted test year, total EPIS for the Company was \$16.4 billion, excluding general and communication plant, as shown on Schedule II-B-1.

**Q. HAVE ANY AMOUNTS RELATED TO ASSET RETIREMENT OBLIGATIONS ("ARO") BEEN ADJUSTED FROM THE TEST YEAR EPIS BALANCE?**

A. Yes. ASC 410-20, *Asset Retirement Obligations*, requires the Company to estimate, recognize, and disclose the present value of future obligations related to the retirement or removal of assets. The Company is required to recognize the obligation as an ARO liability with a corresponding increase to the cost of the

Direct Testimony of Kristie L. Colvin  
CenterPoint Energy Houston Electric, LLC

1 related plant. Consistent with Docket Nos. 38339 and 49421, the Company has  
 2 removed ARO from EPIS.

3 **Q. HAVE ANY OTHER ADJUSTMENTS BEEN MADE TO EPIS?**

4 A. Yes. There are two other adjustments to EPIS. First, as I previously mentioned,  
 5 the Company has removed all test year compensation costs associated with the  
 6 former CEO due to the former CEO's retirement and the resulting COO-CEO  
 7 transition. This includes both capital and expense amounts. The other adjustment  
 8 to EPIS is a minor reclass for Security Lighting plant to reflect test year amounts in  
 9 the proper plant FERC Account. All EPIS adjustments are shown on Exhibit  
 10 KLC-04a and Schedule II-B with explanations provided on Exhibit KLC-04b.<sup>5</sup>

11 **Q. HOW HAS EPIS BEEN FUNCTIONALIZED?**

12 A. The Company relies on the FERC USOA as guidance to functionalize the  
 13 Company's EPIS. Consistent with prior rate cases, a significant portion of the  
 14 Company's EPIS can be directly functionalized based on the FERC USOA;  
 15 however, a small number of EPIS FERC accounts require additional examination  
 16 to be properly functionalized. EPIS FERC Accounts 303 through 374 have been  
 17 specifically mapped to the functions supported by those assets. FERC Accounts  
 18 350 through 359 are primarily assigned to the transmission function, whereas FERC  
 19 Accounts 360 through 374 have been specifically identified and functionalized to  
 20 the distribution function, or to the metering function for FERC Account 370. 16  
 21 TAC § 25.341 defines transmission and distribution to be "system and discretionary  
 22 services associated with facilities" necessary to transform and move electricity

---

<sup>5</sup> Also See WP/II-B-1.

the test year, reflecting a five-year growth of approximately 94% over the December 31, 2018, adjusted rate base of \$6.2 billion in the Company's last base rate case, Docket No. 49421. The direct testimonies of the Company's witnesses support the reasonableness of these investments, along with the capitalization structure and costs of equity and long-term debt.

**Q. WHAT IS THE COMPANY'S REQUESTED RETURN ON RATE BASE FOR THE TEST YEAR?**

A. Applying the Company's requested rate of return to the net rate base produces a reasonable required return of \$850.8 million as shown on Schedule II-B of the RFP and Exhibit KLC-03. <sup>^851.2</sup> <sup>^850.3</sup> **ERRATA 2.** **ERRATA 3.**

## **V. OVERALL COST OF SERVICE**

**Q. HOW IS THIS SECTION OF YOUR TESTIMONY ORGANIZED?**

A. The major components of the Company's overall cost of service are: (A) O&M expenses and A&G expenses; (B) depreciation and amortization; (C) other expenses; (D) federal income taxes; (E) taxes other than federal income taxes; (F) non-electric revenues; and (G) return on rate base. While I discussed the return on rate base above, this portion of my testimony addresses the remaining components. In the O&M/A&G section, I address adjustments to test year amounts which are presented in the workpapers supporting the Company's RFP schedules.

### **A. Operations and Maintenance/Administrative and General Expenses**

**Q. WHAT COSTS ARE INCLUDED IN THE COMPANY'S TEST YEAR O&M EXPENSES?**

1 II-D-2, the Company, therefore, increased FERC 9302 by \$6.6 million for this prior  
 2 period sales tax audit adjustment.<sup>80</sup>

3 **11. Non-Recoverable Costs**

4 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO A&G TEST YEAR COSTS**  
 5 **FOR OTHER NON-RECOVERABLE COSTS.**

6 A. The adjustment for other non-recoverable costs removes \$169,082 in costs that are  
 7 not recoverable through rates under 16 TAC § 25.231(b)(2).<sup>81</sup>

8 **12. Uninsured Property Loss Reserves**

9 **Q. HAS THE COMPANY ADJUSTED ITS TEST YEAR COSTS FOR**  
 10 **UNINSURED PROPERTY LOSS EXPENSE IN FERC ACCOUNT 9240?**

11 A. Yes. The Company included a property self-insurance reserve adjustment of an  
 12 increase of \$~~17.5~~ million. This adjustment is discussed in detail earlier in my  
 13 testimony.<sup>82</sup> ^17.4 When this adjustment is added to the existing test year accrual amount,  
 14 the result is an annual accrual of approximately \$22.3 million for uninsured  
 15 restoration costs in excess of \$100,000 per event.<sup>83</sup> Company witness Mr. Wilson  
 16 discusses the need for the revised insurance accrual in his direct testimony.

17 **Q. HOW HAS THE COMPANY'S UNINSURED PROPERTY LOSS EXPENSE**  
 18 **BEEN FUNCTIONALIZED?**

19 A. The Company's uninsured property loss expense has been functionalized to net  
 20 plant in service.

---

<sup>80</sup> See WP/II-D-2 for the sales tax refund adjustment.

<sup>81</sup> See WP/II-D-2 for the other non-recoverable adjustment.

<sup>82</sup> See Section IV.G 1. Insurance Reserves.

<sup>83</sup> See WP/II-D-2 for the property self-insurance reserve adjustment.

million, other electric revenue of \$61.4 million, and \$426.7 million in revenues from the transmission of electricity of others, for a total unadjusted other electric revenue of \$550.8 million in the test year. Other revenues are shown on Schedule II-E-5.

**Q. ARE NON-ELECTRIC REVENUES INCLUDED IN THE TOTAL ADJUSTED REVENUE REQUIREMENT SHOWN ON SCHEDULE I-A-1?**

A. Yes. Per the RFP Schedule II-E-5 instructions, non-electric revenues reduce the Company's cost of service to arrive at the base revenue requirement. Exhibit KLC-07 shows the cost of service net of other revenues.

**Q. DID THE COMPANY HAVE ANY GAIN OR LOSS ON THE SALE OF LAND DURING THE TEST YEAR?**

A. No.

**Q. WHAT ARE MISCELLANEOUS SERVICE REVENUES?**

A. Miscellaneous service revenues recorded to FERC Account 4510 include connect and reconnect fees, late fees, and right of way grants. The Company increased discretionary service fees by \$3.0 million based on updated tariffs in this filing. An adjustment of \$400,854 was also made to remove an out of period item. The adjusted miscellaneous service revenues in the test year are \$32.3 million.<sup>102</sup>

**Q. HOW ARE MISCELLANEOUS SERVICE REVENUES FUNCTIONALIZED?**

A. Miscellaneous service revenues are directly assigned as shown on RFP workpaper II-E-5.1.1.

<sup>102</sup> See WP/ II-E-5.1 for adjustment to miscellaneous service revenues and WP/ II-E-5.1.1 for a breakout of the miscellaneous service revenues.

1 A. The total adjusted non-electric revenues included in the cost of service is \$73.3  
 2 million as shown on Schedule II-E-5.

3 **VI. ERCOT WHOLESALE TRANSMISSION COST OF SERVICE**

4 **Q. HOW WERE THE TCOS SCHEDULES PREPARED FOR SECTION III OF**  
 5 **THE RFP?**

6 A. Section III of the RFP represents all cost of service components that comprise the  
 7 Company's Wholesale TCOS in ERCOT, including the return on transmission and  
 8 properly assigned general capital investments, net of ADIT, and allowable expenses  
 9 for O&M, A&G, depreciation and amortization, taxes other than income taxes, and  
 10 income taxes. CenterPoint Houston has functionalized its transmission cost of  
 11 service in accordance with 16 TAC §§ 25.191 – 25.203 and the RFP instructions.

12 The Company's transmission cost of service is \$729.3 million, including \$355.5 <sup>^728.8</sup> <sup>^728.1</sup> <sup><355.0</sup>  
 13 million of return on capital investment, is shown on Schedule III-A-1.

14 **VII. OTHER ACCOUNTING MATTERS**

15 **A. CLOUD COMPUTING**

16 **Q. PLEASE EXPLAIN CLOUD COMPUTING AND HOW IT IS BEING USED**  
 17 **BY THE COMPANY.**

18 A. As discussed in Ronald W. Bahr's direct testimony, cloud computing is the delivery  
 19 of IT products, including servers, storage, databases, networking, and software,  
 20 over the internet or "cloud". The use of the cloud will grow over time as more  
 21 companies move away from purchasing IT products or applications within their  
 22 own premises. As Mr. Bahr explains, CNP's cloud computing arrangements  
 23 ("CCAs") are primarily for infrastructure as a service ("IaaS") and software as a  
 24 service ("SaaS"). Please refer to Mr. Bahr's testimony for further discussion of IaaS

1 Q. HAS THE COMPANY ADJUSTED ITS TEST YEAR COSTS FOR RATE  
2 CASE EXPENSES IN FERC ACCOUNT 9280?

3 A. Yes. The rate case expense adjustment of \$51,860, as shown on Schedule II-E-4.4,  
4 removes the Company's amortization of rate case expense related to EE because  
5 these costs are recovered under the separate Rider EECRF.<sup>111</sup>

6 **IX. CONCLUSION**

7 Q. WHAT IS THE TOTAL AMOUNT REQUESTED IN THIS RATE FILING?

8 A. As shown on Schedule I-A-1 and in Exhibit KLC-07, the Company is requesting a  
9 wholesale revenue requirement of \$697.3 million and a retail revenue requirement  
10 of \$3.1 billion.

^ERRATA 2

^ERRATA 3

^696.8

^696.1

11 Q. DOES THIS CONCLUDE YOUR TESTIMONY?

12 A. Yes.

<sup>111</sup> See WP/II-D-2 for the EECRF rate case expense adjustment.

1   **Q.    ARE THE ALLOCATIONS AND ALLOCATION METHODOLOGIES**  
2       **DESCRIBED ABOVE REASONABLE AND CONSISTENT WITH THE**  
3       **APPLICABLE RFP REQUIREMENTS?**

4    A.    Yes, these methodologies are reasonable and are consistent with the Commission's  
5       RFP instructions.

6    **C.               Adjustments to Rate Class Revenue Requirements**

7   **Q.    HAVE YOU MADE ANY ADJUSTMENTS TO THE RATE CLASS**  
8       **REVENUE REQUIREMENTS CALCULATED IN THE CLASS COST OF**  
9       **SERVICE STUDY?**

10   A.    No.    The total amounts allocated to each customer class are shown in  
11       Schedule II-I-Total.

12   **Q.    HOW DID YOU ALLOCATE THE REVENUES RESULTING FROM**  
13       **DISCRETIONARY SERVICE CHARGES AND FROM OTHER**  
14       **REVENUES?**

15   A.    Revenues from Discretionary Service Charges and from Other Revenue are  
16       deducted from the cost of service to arrive at the Company's proposed revenue  
17       requirement. These revenues are allocated on a cost-causation basis, as shown on  
18       Schedule I-A-1, sponsored by Ms. Colvin. Thereafter, the cost was allocated to the  
19       rate classes using the ratios provided in Schedule II-I-2 Class Ratios. See my  
20       Exhibit JRD-3 – ERRATA 23, which summarizes the cost allocations performed.

1 Test Year revenues have been adjusted to normalize billing units and adjust for DCRF  
 \* See schedule IV-I-7 TCRF for TCRF costs

For the Current CCOSS, Test Year O&M expenses, depreciation expenses, and taxes were allocated, and then other revenue was subtracted to derive the current dollar return by class. Current dollar return was then divided by the allocated rate base to derive a percentage return by class. Percentage return by class was then divided by the total company return to determine relative rates of return. For the Proposed CCOSS, CenterPoint Houston's proposed total company percentage return ("unity return") is multiplied by the rate base allocated to each class to determine the associated dollar return by class. The O&M expenses, depreciation expenses, and taxes allocated to each class are then added to the dollar return for each class to develop the cost of service and revenue requirement by class at the proposed rate level. Schedule II-I-Class Allocation Summary of the rate filing package provides the summary of the cost of service analysis, and Schedule II-I-Class Factors provides the class allocation factors.

<sup>1</sup> Test Year revenues have been adjusted to normalize billing units and adjust for DCRF

\* See schedule IV-J-7 TCRF for TCRF costs

For the Current CCOSS, Test Year O&M expenses, depreciation expenses, and taxes were allocated, and then other revenue was subtracted to derive the current dollar return by class. Current dollar return was then divided by the allocated rate base to derive a percentage return by class. Percentage return by class was then divided by the total company return to determine relative rates of return. For the Proposed CCOSS, CenterPoint Houston's proposed total company percentage return ("unity return") is multiplied by the rate base allocated to each class to determine the associated dollar return by class. The O&M expenses, depreciation expenses, and taxes allocated to each class are then added to the dollar return for each class to develop the cost of service and revenue requirement by class at the proposed rate level. Schedule II-I-Class Allocation Summary of the rate filing package provides the summary of the cost of service analysis, and Schedule II-I-Class Factors provides the class allocation factors.

1 Each rate class schedule, except for Lighting Services, includes a Customer Charge,  
2 Metering Charge, Distribution System Charge, and Transmission System Charge.  
3 The current and proposed revenue by rate class and the charges by rate class are  
4 shown in Exhibits JRD-4 – ERRATA 23 and JRD-5 – ERRATA 23, respectively.

5 The Customer Charge and Metering Charge include costs that are incurred  
6 regardless of system usage. The Company bills the Customer Charge and Metering  
7 Charge on a per customer and meter basis, respectively per month to all rate classes  
8 except Lighting Services.

9 The basis for the Distribution and Transmission Charges varies among the  
10 different rate classes. For the Residential and Secondary Service Less Than or  
11 Equal to 10 kVA rate schedules, both the Transmission and Distribution Delivery  
12 Charges are recovered on a per kWh basis. For the Secondary Service Greater Than  
13 10 kVA rate schedule, the Distribution Delivery Charge will be based on Billing  
14 Demand, using NCP kVA. With respect to the Primary Service rate schedule,  
15 Distribution Delivery Charges will be based on the Billing kVA, which is defined  
16 as NCP kVA for the current billing month or 80% of the highest monthly NCP kVA  
17 established in the 11 months preceding the current billing month (“80% Ratchet”).  
18 Seasonal agriculture customers are exempted from the 80% Ratchet. For  
19 Transmission Service, the Distribution Delivery Charges will be based upon 4CP  
20 kVA. For the Secondary Service Greater Than 10 kVA and the Primary Service  
21 rate schedules, the Transmission Charge billing determinant depends upon the type  
22 of meter attributed to the customer. For those customers classified as having IDR  
23 meter service using a traditional IDR meter or an IDR capable AMS meter, the

1     **B.                   Rate Schedules**

2     **Q.     PLEASE DESCRIBE THE RESIDENTIAL SERVICE RATE SCHEDULE.**

3     A.     This rate schedule is available to retail customers requesting delivery service for  
4           residential purposes. The rate schedule sets forth the Monthly Rate (composed of  
5           the Customer Charge, the Metering Charge, the Distribution System Charge, and  
6           the Transmission System Charge), the service riders that may apply to the rate  
7           schedule, and the Company's general terms of service under this rate schedule.

8     **Q.     PLEASE DESCRIBE ANY PROPOSED CHANGES TO THE DELIVERY**  
9           **SYSTEM CHARGES IN THE RESIDENTIAL SERVICE RATE**  
10          **SCHEDULE.**

11    A.     CenterPoint Houston is proposing to update the delivery system charges in the  
12           Residential Service rate schedule to reflect the revenue requirement by function as  
13           described in the Proposed CCROSS. The proposed Residential Service rate schedule  
14           is included in Exhibit JRD-9 – ERRATA 23.

15    **Q.     PLEASE DESCRIBE THE SECONDARY SERVICE LESS THAN OR**  
16          **EQUAL TO 10 KVA RATE SCHEDULE.**

17    A.     This rate schedule is available to retail customers requesting delivery service for  
18           non-residential purposes with demands less than or equal to 10 kVA and to retail  
19           customers requesting unmetered services other than Lighting Services. The rate  
20           schedule sets forth the Monthly Rate (composed of the Customer Charge, the  
21           Metering Charge, and the Distribution System Charge and Transmission System  
22           Charge), the service riders that may apply to the rate schedule, and the Company's  
23           general terms of service under this rate schedule.

1 applicable, and Transmission and Distribution Charges), the service riders that may  
2 apply to the rate schedule, and the Company's general terms of service under this  
3 section of the rate schedule.

4 **Q. PLEASE DESCRIBE ANY CHANGES TO THE DELIVERY SYSTEM**  
5 **CHARGES FOR MLS.**

6 A. MLS charges have been updated to reflect the revenue requirement by function as  
7 filed in the Proposed CCOSS.

8 **C. Riders**

9 **Q. WILL YOU BRIEFLY EXPLAIN THE TAX RIDER CENTERPOINT**  
10 **HOUSTON IS PROPOSING?**

11 A. Yes. The Company is proposing a rider as a result of the Inflation Reduction Act  
12 of 2022 ("IRA") to recover or refund changes in the Company's tax obligation  
13 ("Rider IRA") as discussed by Company witness Mrs. Story. Company witness  
14 Kristie Colvin directly addresses the proposed costs for recovery through the Rider  
15 IRA. The proposed Rider IRA can be found in Exhibit JRD – 9 – ERRATA 23.

16 **1. Rider IRA**

17 **Q. WHAT ALLOCATION METHOD DID YOU APPLY TO THE COSTS IN**  
18 **THE PROPOSED RIDER IRA?**

19 A. I allocated costs using the Taxable Income Allocators excluding transmission in the  
20 II-I-2 Class Ratios schedule. The Distribution, Customer and Meter functions were  
21 used to determine the allocation for the retail Rider IRA. The revenue requirement  
22 for the Transmission function will be allocated using 4CP, from the Wholesale  
23 Tariff, through the TCRF. A schedule has been provided in Schedule IV-J-7 Rider

1 meet the provisions of the rate and choose to switch to another utility for their  
2 provision of electric delivery service. CenterPoint Houston proposes updating the  
3 charges to reflect the current cost of providing this service but proposes no other  
4 changes.

5 **7. Rate CMC – Competitive Metering Credit**

6 **Q. IS THE COMPANY PROPOSING ANY CHANGES TO RIDER CMC –**  
7 **COMPETITIVE METERING CREDIT?**

8 A. No. Rider CMC – Competitive Metering Credit is applicable to customers that  
9 qualify and choose to have a competitive meter. Rider CMC provides a credit to  
10 the billing for the customer to recognize that the meter is not owned or provided by  
11 CenterPoint Houston.

12 **8. Rate RCE – Rate Case Expenses Surcharge**

13 **Q. IS CENTERPOINT HOUSTON PROPOSING ANY CHANGES TO RIDER**  
14 **RCE - RATE CASE EXPENSES SURCHARGE?**

15 A. Yes. The Company has recovered all approved rate case expenses from previous  
16 dockets that were being recovered under this rider. However, the Company has  
17 deferred rate case expenses from previous rate filings and will incur new rate case  
18 expenses in this proceeding that will be recovered through Rider RCE. The  
19 Company proposes to change this rider to recover the level of rate case expenses  
20 that are determined to be reasonable by the Commission as a result of this  
21 proceeding. CenterPoint Houston proposes a three-year recovery period for  
22 Rider RCE. Rider RCE charges are applicable to each of the six rate classes. The  
23 proposed changes to Rider RCE are shown in Exhibit JRD-9 – ERRATA 23.

1 all times comply with Company's Transmission & Substation  
 2 Outage and Clearance Coordination Procedures" (as may be  
 3 amended from time to time) and the requirements in Sections 5.5.2  
 4 and 5.5.5 of this Tariff.

5 **Q. ARE THERE ADDITIONAL NON-RATE TARIFF CHANGES**  
 6 **IDENTIFIED IN JRD-7?**

7 A. Yes. As mentioned above, CenterPoint Houston is making several changes to  
 8 remove unused riders from the class tariff sheets, harmonize tariff language and  
 9 make other non-substantive changes to improve readability or understanding of the  
 10 tariff language.

11 **Q. CAN YOU PLEASE GIVE SOME EXAMPLES OF THESE CHANGES?**

12 A. Yes. I can offer three examples. First, the Company is updating the Table of  
 13 Contents to reflect deleted Chapter 6 tariff sheets and reordering the remaining  
 14 tariff sheets. Second, the Company is removing references to deleted tariff sheets  
 15 in each of the rate classes. Third, the Company is harmonizing AMS capable IDR  
 16 meter language and traditional IDR meter language to represent the same  
 17 functionality of the meters, despite their technological differences.

18 **VII. CHANGES TO CUSTOMER AGREEMENTS**

19 **Q. HAVE YOU INCLUDED A SUMMARY OF THE COMPANY'S**  
 20 **PROPOSED RATE AND NON-RATE TARIFF CHANGES WITH YOUR**  
 21 **TESTIMONY?**

22 A. Yes. Exhibit JRD-8 – ERRATA 23 is a redline showing the proposed revisions to  
 23 the Retail Tariff.

1 **Q. ARE THESE CHANGES REASONABLE?**

2 A. Yes, for the reasons discussed above in my discussion of the individual changes.

3 **VIII. WHOLESALE DELIVERY SERVICE TARIFF**

4 **Q. WHAT CHANGES ARE YOU PROPOSING TO THE WHOLESALE**  
5 **TARIFF?**

6 A. I propose updating the charge in the Wholesale Transmission Service – WTS rate,  
7 Sheet No. 4.1 in the Wholesale Tariff, to reflect CenterPoint Houston’s current cost  
8 of providing this service. This charge is determined by dividing CenterPoint  
9 Houston’s Test Year adjusted Transmission cost of ~~\$696,755,404~~696,094,011 by  
10 the year 2024 ERCOT 4CP, 83,557 addressed in Docket No. 56050<sup>21</sup>, for a  
11 Wholesale Transmission Service Rate of ~~\$8,338.6992~~8,330.7837 per MW. This  
12 proposed change for the Wholesale Delivery Tariff is shown in Exhibit JRD-10 –  
13 ERRATA 23.

14 **Q. IS THIS THE WHOLESALE RATE THAT YOU ARE PROPOSING TO BE**  
15 **EFFECTIVE AT THE CONCLUSION OF THIS CASE?**

16 A. No. Interim Transmission Cost of Service updates are allowed under 16 TAC §  
17 25.192(h)(1) and it is possible that CenterPoint Houston will have had an interim  
18 TCOS approved while this case is in process. CenterPoint Houston will update its  
19 TCOS to reflect costs captured in the Test Year and the additions included after the  
20 Test Year.

---

<sup>21</sup> Commission Staff’s Petition to Set 2024 Wholesale Transmission Service Charges for the Electric Reliability Council of Texas Docket No. 56050(pending). It should be noted that although the 2024 4CP calculation had not been approved at the time this application was filed, the Company utilized the proposed rates pending approval in this proceeding for purposes of setting the wholesale charge.

1 the rider in Section 4.3 of the tariff. The Distribution Service Charge adjustment is  
2 based on the monthly per unit cost (the “WDCRF”) multiplied by the Customer's  
3 appropriate monthly billing determinant. The WDCRF is calculated according to  
4 the formula as set out in the tariff. Currently, there is no charge for WDCRF. WDS  
5 customers will be assessed the Wholesale Distribution Rider WD IRA.

6 **Q. WILL YOU BRIEFLY EXPLAIN THE WHOLESALE DISTRIBUTION**  
7 **TAX RIDER CENTERPOINT HOUSTON IS PROPOSING?**

8 A. Yes. The Company is proposing Rider WD IRA to recover changes in the  
9 Company's tax obligation as discussed by Company witness Mrs. Story. Company  
10 witness Kristie Colvin directly addresses the proposed cost for recovery through  
11 the Rider IRAs. The proposed Wholesale Distribution Rider WD IRA can be found  
12 in Exhibit JRD-10 – Errata ~~23~~.

13 **Q. WHAT ALLOCATION METHOD DID YOU APPLY TO THE COSTS IN**  
14 **THE PROPOSED TAX RIDER?**

15 A. I allocated costs using the Taxable Income Allocators excluding transmission in the  
16 II-I-2 Class Ratios schedule, in the same manner I developed the allocation  
17 percentage and rates for the retail Primary customer class. The Distribution,  
18 Customer and Meter functions were used to determine the allocation for the Retail  
19 Primary customer class and those charges or other Commission approved rates will  
20 be applicable to the Wholesale Distribution Rider WD IRA once the Commission  
21 rule is updated and Wholesale Distribution Service rates are in effect. The revenue  
22 requirement for the Transmission function does not apply to WDS customers.

PUBLIC UTILITY COMMISSION OF TEXAS

**CHAPTER 6: COMPANY SPECIFIC ITEMS****6.1 RATE SCHEDULES****6.1.1 DELIVERY SYSTEM CHARGES****6.1.1.1 CHARGES FOR TRANSMISSION AND DISTRIBUTION SYSTEM  
SERVICE****6.1.1.1.1 RESIDENTIAL SERVICE****AVAILABILITY**

This schedule is available to Retail Customers requesting Delivery Service for Residential Purposes when such Delivery Service is to one Point of Delivery and measured through one Meter and, except as otherwise provided in this Rate Schedule, is not for shared or resale purposes.

**MONTHLY RATE****I. Transmission and Distribution Charges:**

Customer Charge	<del>\$2.30</del> <del>\$2.16</del> <del>\$2.12</del> <del>\$2.11</del>	per Retail Customer per Month
Metering Charge	<del>\$2.09</del> <del>\$2.77</del> <del>\$2.80</del> <del>\$2.79</del>	per Meter per Month
Transmission System Charge	\$0.00	per kWh
Distribution System Charge	<del>\$0.020314</del> <del>\$0.026100</del> <del>\$0.025940</del> <del>\$0.026040</del> <del>\$0.026100</del>	per kWh

**II. Transition Charge:**See Schedules ~~TC2, TC3, SRC, and~~ TC5**III. Nuclear Decommissioning Charge:**

See Rider NDC

**IV. Transmission Cost Recovery Factor:**

See Rider TCRF

**V. Other Charges or Credits:**

A. Municipal Account Franchise Credit (see application and explanation below)	<del>(\$0.001756)</del> <del>(\$0.001767)</del>	per kWh
B. Rate Case Expenses Surcharge		See Rider RCE

<u>F. Inflation Reduction Act 2022</u>	<u>See Rider IRA</u>

**TERMS OF SERVICE**

Type of Service. The standard Delivery Service under this Rate Schedule will be single-phase, 60 hertz, at the Company's standard Secondary Distribution Voltage level for this type of service as described in Section 6.2.2 of this Tariff and in the Company's Service Standards. Three-phase service is generally not available for Residential Purposes. Retail Customers desiring three-phase service for Residential Purposes should check with a Company representative to determine if three-phase service is available. Facilities for three-phase service under this Rate Schedule are Non-Standard Facilities as defined in the Company's Construction Services Policy.

Metering Equipment. Delivery Service under this Rate Schedule will be metered using Company's Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities.

Construction Services. Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

Residential Service to Multiple Dwellings. Where more than four Individual Private Dwellings in an apartment or other residential building are served through one Meter, billing will be under the applicable non-residential Rate Schedule.

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company based on the kWh delivered within that municipality and who have signed an appropriate Franchise Agreement.

Reclassification for Non-Residential Purposes. If the Company determines that a significant portion of the Delivery Service provided under this Residential Service Rate Schedule is used for non-Residential Purposes, then the appropriate non-residential Rate Schedule shall be applicable to all the Delivery Service provided. However, if the Retail Customer's wiring is so arranged that the Delivery Service for Residential Purposes and for non-Residential Purposes can be metered separately, this Residential Service Rate Schedule will remain applicable to the portion that is metered separately for Residential Purposes.

On-Site Generation. Delivery Service under this Rate Schedule to a Retail Customer with on-site distributed generation (as defined in section 25.211 of the Commission's rules) may also be subject to the terms, conditions, fees and charges set out in Section 6.1.2.4 of this Tariff, regarding the interconnection and parallel operation of distributed generation.

**NOTICE**

This Rate Schedule is subject to the Company's Tariff and Applicable Legal Authorities.

Type of Service. The standard Delivery Service under this Rate Schedule will be single-phase, 60 hertz, at the Company's standard Secondary Distribution Voltage level for this type of service as described in Section 6.2.2 of this Tariff and in the Company's Service Standards. Facilities for three-phase service under this Rate Schedule are Non-Standard Facilities as defined in the Company's Construction Services Policy.

Metering Equipment. Except for Unmetered Service described below, Delivery Service under this Rate Schedule will be metered using Company's Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities.

Construction Services. Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

Peak Demand Requirement. This Rate Schedule is applicable only to Retail Customers whose peak demand for the current month is 10 kVA or less, as measured in the Retail Customer's fifteen-minute period of highest demand, and whose peak demand has not exceeded 10 kVA in any of the previous eleven months. If, after taking Delivery Service under this Rate Schedule, Retail Customer's monthly peak demand is greater than 10 kVA, Retail Customer will be placed on the *Secondary Service Greater Than 10 kVA* Rate Schedule for a period of not less than twelve months.

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company based on the kWh delivered within that municipality and who have signed an appropriate Franchise Agreement.

Unmetered Service. Unmetered Service is available under this Rate Schedule for non-residential, non-lighting Delivery Service at the discretion of the Company, Competitive Retailer, and Retail Customer, in limited situations when metering equipment is impractical or disproportionately

## Chapter 6: Company Specific Items

Applicable: Entire Service Area

CNP 8037

expensive, and when the Retail Customer's electric load can be reasonably estimated or predicted from the nameplate or engineering studies of the installed equipment. Special protective devices may be required to be installed and/or paid for by customer. Provision of Unmetered Service under this Rate Schedule will require an agreement that includes certification by Retail Customer on at least an annual basis of the number of installed devices and specific location of each device. Company will calculate billing determinants for Unmetered Service based on a 100 percent load factor. These billing determinants are applied to all charges included in this Rate Schedule, except that the "Metering Charge" contained in the monthly rate is not applicable to Unmetered Service under this Rate Schedule.

On-Site Generation. Delivery Service under this Rate Schedule to a Retail Customer with on-site distributed generation (as defined in section 25.211 of the Commission's rules) may also be subject to the terms, conditions, fees and charges set out in Section 6.1.2.4 of this Tariff, regarding the interconnection and parallel operation of distributed generation.

**NOTICE**

This Rate Schedule is subject to the Company's Tariff and Applicable Legal Authorities.

**TERMS OF SERVICE****DETERMINATION OF BILLING DEMAND FOR TRANSMISSION SYSTEM CHARGES**

Application of IDR or IDR Capable AMS Metered Charges. The IDR or IDR Capable AMS Metered charges listed in the Monthly Rate section of this Rate Schedule are applicable to Retail Customers who have established an NCP demand greater than 700 kVA in any previous billing month, and to Retail Customers who were billed on a 4CP kVA basis prior to the effective date of this Rate Schedule, regardless of whether their Meter is an IDR, -IDR Capable AMS Meter, a Standard Meter or other Meter.

Determination of NCP kVA. The NCP kVA applicable under the Monthly Rate section shall be the kVA supplied during the 15 minute period of maximum use during the billing month.

## Chapter 6: Company Specific Items

Sheet No. 6.3

Page 3 of 4

CenterPoint Energy Houston Electric, LLC  
Applicable: Entire Service Area

CNP 8037

Determination of 4 CP kVA. The 4 CP kVA applicable under the Monthly Rate section shall be the average of the Retail Customer's integrated 15 minute demands at the time of the monthly ERCOT system 15 minute peak demand for the months of June, July, August and September of the previous calendar year. The Retail Customer's average 4CP demand will be updated effective with the February billing month of each year and remain fixed for a year. Retail Customer's previous metered usage under this or any other Rate Schedule will be used, as needed, in determining the billing determinants under the Monthly Rate section. Retail Customers without previous history on which to determine their 4 CP kVA will be billed at the applicable NCP rate under the "Transmission System Charge" using the Retail Customer's NCP kVA.

DETERMINATION OF BILLING DEMAND FOR DISTRIBUTION SYSTEM CHARGES

Determination of Billing kVA. The Billing kVA applicable to the Distribution System Charge shall be the NCP kVA for the current billing month.

OTHER PROVISIONS

Type of Service. The standard Delivery Service under this Rate Schedule will be single or three-phase, 60 hertz, at the Company's standard Secondary Distribution Voltage level for this type of service as described in Section 6.2.2 of this Tariff and in the Company's Service Standards.

Metering Equipment. Delivery Service under this Rate Schedule will be metered using Company's Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities.

Construction Services. Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

Peak Demand Requirement. This Rate Schedule is applicable only to Retail Customers whose peak demand for the current month is greater than 10 kVA, as measured in the Retail Customer's fifteen-minute period of highest demand, or whose peak demand exceeded 10 kVA in any of the previous eleven months.

Temporary Service. This Rate Schedule is also applicable to Retail Customers who need Delivery Service at Secondary Distribution Voltage levels on a temporary basis for construction activities, for emergency shelters and temporary housing facilities managed by the Federal Emergency Management Agency or other state or federal agency after a natural or other disaster, and for other temporary facilities or purposes as determined by Company. The Company's construction of Delivery System facilities for the provision of such temporary Delivery Service is subject to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

## Chapter 6: Company Specific Items

Sheet No. 6.3

Page 4 of 4

CenterPoint Energy Houston Electric, LLC  
Applicable: Entire Service Area

CNP 8037

Sub-Metering. The Electric Power and Energy delivered may not be re-metered or sub-metered by the Retail Customer for resale except pursuant to lawful sub-metering regulations of Applicable Legal Authorities.

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company based on the Billing kVA within that municipality and who have signed an appropriate Franchise Agreement.

Adjustment To The Charges Applied To Retail Customer's Demand Measurement. If data to determine the Retail Customer's *Demand Measurement* becomes no longer available, the Company will determine a *Conversion Factor* which will be used as an adjustment to all per unit charges that will then be applied to the *New Demand Measurement*. *Demand Measurement* shall include the Billing kVA, the 4 CP kVA, NCP kVA or any other demand measurement required for billing under this Rate Schedule or any applicable rider(s) or any other applicable schedule(s). *New Demand Measurement* shall be the billing determinants which replace the *Demand Measurement*. The *Conversion Factor* will apply to unit prices per kVA such that when applied to the *New Demand Measurement*, the revenue derived by the Company under demand based charges shall be unaffected by such lack of data.

This adjustment may become necessary because of changes in metering capabilities, such as, Meters that record and /or measure kW with no ability to determine kVA or Meters which meter data in intervals other than 15 minutes. This adjustment also may become necessary due to changes in rules, laws, procedures or other directives which might dictate or recommend that Electric Power and Energy, electric power related transactions, wire charges, nonbypassable charges and/or other transactions measure demand in a way that is inconsistent with the definitions and procedures stated in the Company's Tariff. This adjustment is applicable not only in the instances enumerated above but also for any and all other changes in *Demand Measurement* which would prevent the Company from obtaining the necessary data to determine the kVA quantities defined in this Rate Schedule, applicable Riders and other applicable schedules.

The Conversion Factor shall render the Company revenue neutral to any change in *Demand Measurement* as described above.

On-Site Generation. Delivery Service under this Rate Schedule to a Retail Customer with on-site distributed generation (as defined in section 25.211 of the Commission's rules) may also be subject to the terms, conditions, fees and charges set out in Section 6.1.2.4 of this Tariff, regarding the interconnection and parallel operation of distributed generation.

**NOTICE**

This Rate Schedule is subject to the Company's Tariff and Applicable Legal Authorities.

kVA will be billed at the applicable NCP rate under the “Transmission System Charge” using the Retail Customer’s NCP kVA.

**DETERMINATION OF BILLING DEMAND FOR DISTRIBUTION SYSTEM CHARGES**

Determination of Billing kVA. For loads whose maximum NCP kVA established in the 11 months preceding the current billing month is less than or equal to 20 kVA, the Billing kVA applicable to the Distribution System Charge shall be the NCP kVA for the current billing month. For all other loads, the Billing kVA applicable to the Distribution System Charge shall be the higher of the NCP kVA for the current billing month or 80% of the highest monthly NCP kVA established in the 11 months preceding the current billing month (80% ratchet). The 80% ratchet shall not apply to seasonal agricultural Retail Customers.

**OTHER PROVISIONS**

Type of Service. The standard Delivery Service under this Rate Schedule will be single or three-phase, 60 hertz, at the Company’s standard Primary Distribution Voltage levels described in Section 6.2.2 of this Tariff and in the Service Standards.

Metering Equipment. Delivery Service under this Rate Schedule will be metered using Company’s Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities.

Construction Services. Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company’s Construction Services Policy in Section 6.1.2.2 of this Tariff.

Temporary Service. This rate schedule is also applicable to Retail Customers who need Delivery Service at Primary Distribution Voltage levels on a temporary basis for construction activities, for emergency shelters and temporary housing facilities managed by the Federal Emergency Management Agency or other state or federal agency after a natural or other disaster, and for other temporary facilities or purposes as determined by Company. The Company’s construction of Delivery System facilities for the provision of such temporary Delivery Service is subject to the Company’s Construction Services Policy in Section 6.1.2.2 of this Tariff.

Sub-Metering. The Electric Power and Energy delivered may not be re-metered or sub-metered by the Retail Customer for resale except pursuant to lawful sub-metering regulations of Applicable Legal Authorities.

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company

## Chapter 6: Company Specific Items

Sheet No. 6.5

CNP 8037

based on the Billing kVA within that municipality and who have signed an appropriate Franchise Agreement.

Adjustment To The Charges Applied To Retail Customer's Demand Measurement. If data to determine the Retail Customer's *Demand Measurement* becomes no longer available, the Company will determine a *Conversion Factor* which will be used as an adjustment to all per unit charges that will then be applied to the *New Demand Measurement*. *Demand Measurement* shall include the Billing

kVA, the 4 CP kVA, NCP kVA or any other demand measurement required for billing under this Rate Schedule or any applicable Rider(s) or any other applicable schedule(s). *New Demand Measurement* shall be the billing determinants which replace the *Demand Measurement*. The *Conversion Factor* will apply to unit prices per kVA such that when applied to the *New Demand Measurement*, the revenue derived by the Company under demand based charges shall be unaffected by such lack of data.

This adjustment may become necessary because of changes in metering capabilities, such as, Meters that record and /or measure kW with no ability to determine kVA or Meters which meter data in intervals other than 15 minutes. This adjustment also may become necessary due to changes in rules, laws, procedures or other directives which might dictate or recommend that Electric Power and Energy, electric power related transactions, wire charges, nonbypassable charges and/or other transactions measure demand in a way that is inconsistent with the definitions and procedures stated in the Company's Tariff. This adjustment is applicable not only in the instances enumerated above but also for any and all other changes in *Demand Measurement* which would prevent the Company from obtaining the necessary data to determine the kVA quantities defined in this Rate Schedule, applicable Riders and other applicable schedules.

The Conversion Factor shall render the Company revenue neutral to any change in *Demand Measurement* as described above.

Metering Adjustment. The Company may at its option measure service on the secondary side of the Retail Customer's transformers in which event the kVA and kWh recorded by the Billing Meter will be adjusted to compensate for transformer losses as follows: (1) where the Retail Customer's installed substation capacity is 600 kVA or less, the kVA will be increased by 2% and the kWh will be increased by 3%; or (2) where the Retail Customer's installed substation capacity is in excess of 600 kVA, the kVA and kWh will be increased by proper respective adjustments based upon data furnished by the manufacturer. In the event the manufacturer is unable to supply the necessary data, the adjustment will be based on tests conducted on the Retail Customer's transformers by the Company.

On-Site Generation. Delivery Service under this Rate Schedule to a Retail Customer with on-site distributed generation (as defined in section 25.211 of the Commission's rules) may also be subject to the terms, conditions, fees and charges set out in Section 6.1.2.4 of this Tariff, regarding the interconnection and parallel operation of distributed generation.

**NOTICE**

This Rate Schedule is subject to the Company's Tariff and Applicable Legal Authorities.

## TERMS OF SERVICE

### DETERMINATION OF BILLING DEMAND FOR TRANSMISSION SYSTEM CHARGES AND DISTRIBUTION SYSTEM CHARGES

Determination of NCP kVA. The NCP kVA applicable under the Monthly Rate section shall be the kVA supplied during the 15 minute period of maximum use during the billing month.

Determination Of 4 CP kVA. The 4 CP kVA applicable under the Monthly Rate section shall be the average of the Retail Customer's integrated 15 minute demands at the time of the monthly ERCOT system 15-minute peak demand for the months of June, July, August and September of the previous calendar year. The Retail Customer's average 4CP demand will be updated effective with the February billing month of each year and remain fixed for a year. Retail Customer's previous metered usage under this or any other rate schedule will be used, as needed, in determining the billing determinants under the Monthly Rate section. Retail Customers without previous history on which to determine their 4 CP kVA will be billed based on estimated 4 CP kVA in accordance with the following procedures:

- (a) Retail Customers having IDR data for fewer than 4 CP kVA, but at least 2 CP kVA, will be billed based on the average of the actual CP kVA, so long as the CP

## Chapter 6: Company Specific Items

Sheet No. 6.5

Page 3 of 5

CenterPoint Energy Houston Electric, LLC  
Applicable: Entire Service Area

CNP 8037

kVA are representative of the Retail Customer's expected load, as derived from engineering estimates. If the CP kVA are not representative of the expected load, the estimated 4 CP kVA will be set based on mutual agreement between the Retail Customer and the Company.

- (b) Retail Customers that do not have at least 2 CP kVA will be billed by estimating the Retail Customer's 4 CP kVA demand by applying a class coincidence factor to the Retail Customer's NCP kVA, using the formula:

$$\text{Estimated 4 CP kVA} = (\text{NCP kVA} * \text{TCCF})$$

Where:

NCP kVA is the highest 15-minute integrated demand of an individual Retail Customer served at transmission voltage during the month; and

TCCF is the transmission class coincidence factor for the months June, July, August, and September calculated from the Company's most recent general rate case proceeding using the following formula:

$$\text{TCCF} = \frac{\sum \text{Class CP}_1 \text{ kVA for June, July, August, September}}{\sum \text{Class NCP kVA for June, July, August, September}} = \frac{0.784009}{0.873222}$$

Where:

Class CP kVA is the transmission voltage rate class' 15-minute demand at the time of the ERCOT CP and Class NCP kVA is the transmission voltage class' maximum 15-minute demand during a month.

OTHER PROVISIONS

Type of Service. The standard Delivery Service under this Rate Schedule will be three-phase, 60 hertz, at the Company's standard Transmission Voltage levels described in Section 6.2.2 of this Tariff and in the Service Standards.

Metering Equipment. Delivery Service under this Rate Schedule will be metered using Company's Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities. The Company may install remote metering equipment to obtain information with which to determine the amount of the monthly bill. Retail Customer may have metering instruments installed to check the service supplied under this Rate Schedule in accordance with the provisions of the Tariff.

Construction Services. Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

Customer Load Study Charge. Company may conduct a load study for Retail Customers requesting Delivery Service under this Rate Schedule for a new load or load addition of 10 MW or more, and Company will charge, and Retail Customer must pay, an additional charge of \$50,000.00 for the load study. The Company will waive this load study requirement and study fee for new loads and load additions of less than 10 MW, unless Company or ERCOT determines that a load study is required prior to connecting the new or additional load of less than 10 MW to the Transmission Voltage System. Additionally, if Company or ERCOT require a stability study to be performed, an additional charge of \$50,000.00 will be applied to Retail Customer, for a total of \$100,000.00.

Retail Customer Responsibilities. The Retail Customer shall own, operate, and maintain all facilities (except Company owned Billing Meter) necessary to receive three-phase, 60 hertz alternating current service at 60,000 volts or higher. Each Retail Customer served at Transmission Voltage shall comply with Company's operating requirements for transmission customers.

Sub-Metering. The Electric Power and Energy delivered under this Rate Schedule may not be re-metered or sub-metered by the Retail Customer for resale or sharing except pursuant to lawful sub-metering regulations of Applicable Legal Authorities.

On-Site Generation. If Retail Customer taking Delivery Service under this Rate Schedule has on-site electric generating capacity installed, additional contract arrangements may be required pursuant to section 5 of the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff if less than 10 MW or pursuant to ERCOT guidelines and procedures if 10 MW or greater.

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company based on the kWh delivered within that municipality and who have signed an appropriate Franchise Agreement.

Adjustment To The Charges Applied To Retail Customer's Demand Measurement. If data to determine the Retail Customer's *Demand Measurement* becomes no longer available, the Company will determine a *Conversion Factor* which will be used as an adjustment to all per unit charges that will then be applied to the *New Demand Measurement*. *Demand Measurement* shall include the Billing kVA, the 4 CP kVA, NCP kVA or any other demand measurement required for billing under this rate schedule or any applicable rider(s) or any other applicable schedule(s). *New Demand Measurement* shall be the billing determinants which replace the *Demand Measurement*. The *Conversion Factor* will apply to unit prices per kVA such that when applied to the *New Demand*

CNP 8037

*Measurement*, the revenue derived by the Company under demand based charges shall be unaffected by such lack of data.

This adjustment may become necessary because of changes in metering capabilities, such as, meters that record and /or measure kW with no ability to determine kVA or meters which meter data in intervals other than 15 minutes. This adjustment also may become necessary due to changes in rules, laws, procedures other directives which might dictate or recommend that electric power, electric power related transactions, wire charges, nonbypassable charges and/or other transactions measure demand in a way that is inconsistent with the definitions and procedures stated in the Company's Tariff. This adjustment is applicable not only in the instances enumerated above but also for any and all other changes in *Demand Measurement* which would prevent the Company from obtaining the necessary data to determine the kVA quantities defined in this rate schedule, applicable riders and other applicable schedules.

The Conversion Factor shall render the Company revenue neutral to any change in *Demand Measurement* as described above.

Metering Adjustment. The Company may at its option measure service on the low voltage side of the Retail Customer's transformers in which event the kVA and kWh recorded by the Billing Meter will be adjusted to compensate for transformer losses on the basis of data furnished by the manufacturer of the Retail Customer's transformers. When the manufacturer is unable to supply the necessary data the adjustment will be based on tests conducted by the Company on the Retail Customer's transformers.

**NOTICE**

This Rate Schedule is subject to the Company's Tariff and Applicable Legal Authorities.

CNP 8037

**6.1.1.1.6 LIGHTING SERVICES**  
(Street Lighting and Miscellaneous Lighting Services)**STREET LIGHTING SERVICE****AVAILABILITY**

Street lighting service is available to cities, governmental agencies, real estate developers and other groups (herein referred to as Retail Customers) requesting the installation of Company-owned and maintained street lighting systems along public streets, roadways or other public access areas in accordance with Section 6.1.2.2, Construction Services, in this Tariff. Street lighting service is not applicable to privately-owned street lighting systems. Privately-owned street lighting systems may be eligible for Delivery Service under the Company's applicable rate schedule for Secondary or Primary Service.

**TYPE OF SERVICE**

Street lighting service consists of the installation of Company-owned street lights, fixtures, luminaires and lamps (collectively, Lamps) and (if requested by Retail Customer) ornamental standards along public streets, roadways or other public access areas in accordance with section 6 of the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff, as well as the delivery of Electric Power and Energy at Company's standard Secondary Distribution Voltages to, and the maintenance and replacement of, such installations pursuant to the rates set forth in this Rate Schedule. If ornamental standards are not requested by Retail Customer, the Lamp installations will be mounted on the Company's existing distribution poles, if available, and served by overhead conductors. The Company's standard Lamp type for all street lighting service installations and replacements is Light Emitting Diode (LED). A Retail Customer's request for a non-standard Lamp type will be subject to the availability of the Lamp type in Company's inventory. The Company is no longer Procuring non-standard Lamp types for its inventory.

Street lighting service will be provided at various voltages as determined by the Company. Delivery Service under this Rate Schedule is an Unmetered Service. Company will install, own and maintain the street lighting service installations provided hereunder. Company's street lighting service is built to NESC standards. At the request of Customer and at Company's discretion, Company may build to other standards, with Customer being responsible for any difference in cost. All street Lamps, including LED Lamps, will burn out and/or dim over time, and therefore the lumens delivered by a street Lamp will vary over time and will vary from Lamp to Lamp. Company will replace burned out street Lamps, and/or make maintenance repairs during regular working hours, at its own cost and expense and will generally have the lighting service restored within 72 hours after notification by the Retail Customer, but with no adjustment of payments hereunder due to outage or varying levels of lumens. Street Lamps furnished hereunder shall operate under normal conditions from approximately thirty minutes after sunset to approximately thirty minutes before sunrise every night in the year and the assumed total time of operations will be approximately four thousand (4,000) hours each year for each light furnished.

**MONTHLY RATE****I. Transmission and Distribution Charges**

The monthly charges listed in the table below cover the provision of Delivery Service to street lighting systems requested by Retail Customer and installed by Company pursuant to this Rate Schedule, including the maintenance but excluding the installation of those systems. Charges for the installation of street lighting systems are governed by the Construction Services Policy in Section 6.1.2.2 of this Tariff.

In addition to the following monthly charges per Lamp, an additional ~~\$0.89~~ ~~\$1.13~~ ~~\$1.09~~ ~~\$1.07~~ per month will be charged for each Lamp with a break-away base if requested by Retail Customer and installed by Company.

**OTHER****PROVISIONS**

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company based on the kWh within that municipality and who have signed an appropriate Franchise Agreement.

LED Street Lamp Lumen Levels. By choosing an LED street lighting option, Retail Customer (1) acknowledges that there will be variances in lumen levels and energy consumption between individual LED Lamps and between an LED Lamp and the applicable lumen and watt levels for the Lamp set forth in the table above, and (2) agrees to not hold Company liable for any variations in LED Lamp performance.

The Initial Lumen and Watt levels shown in the table above for LED street lights reflect a target average lumen output and a target average wattage level range and may not be representative of any particular LED Lamp.

The Monthly KWH level shown in the table above for LED street Lamps reflects a target average KWH level and may not be representative of any particular LED luminaire.

**MISCELLANEOUS LIGHTING SERVICE****AVAILABILITY**

Miscellaneous Lighting Service is available in areas designated by Company with suitable locations, where permission for installation has been granted by all affected parties, and where facilities of adequate capacity and suitable voltage are adjacent to the lighting fixture(s) to be served. All new fixtures installed by Company for the provision of Miscellaneous Lighting Service must be purchased from a third-party vendor and owned by the Retail Customer or the Retail Customer's REP ("Customer Owned Installation" or "Customer Owned Fixture"). All Customer Owned Fixtures must be approved by Company prior to installation and must conform to one of the lamp types described in the table below,

Revision Number: ~~21~~<sup>\*</sup> 22ndEffective: ~~04/15/23~~ xx/xx/xx

CNP 8037

except that metal halide and mercury vapor fixtures will no longer be approved by Company for installation as Customer Owned Fixtures. Existing Company owned fixtures will continue to be owned by the Company ("Company Owned Installation" or "Company Owned Fixture"). Miscellaneous Lighting Service consists of the delivery of electric power and energy to, and the installation and maintenance of lighting fixtures, as described herein. Retail Customer's electric power and energy must be provided by the Retail Customer's REP in accordance with Applicable Legal Authorities and the Company's Tariff.

**TYPE OF SERVICE**

Miscellaneous Lighting Service is provided as an Unmetered Service at Company's standard secondary distribution voltages to Customer Owned and Company Owned Fixtures which operate automatically every night from dusk to dawn. The Company will install, make electrical connection(s), and maintain the lighting fixture(s), whether Customer Owned or Company Owned.

Charges for services shall commence on the date that the electrical connection is made.

**MONTHLY RATE****I. Transmission and Distribution Charges**

In addition to the installation charges described below for Customer Owned Fixtures, the following monthly charges apply to Miscellaneous Lighting Service.

A. Only the T&D Charge below is applicable to Customer Owned Installations.

B. The T&D Charge and the Fixture Charge below are applicable to Company Owned Installations. In addition to the T&D Charge and the Fixture Charge for each lamp type in the table below, an additional charge of ~~\$2.16~~~~\$2.80~~ ~~\$2.77~~~~\$6.84~~ per month is charged for a span of secondary which was installed exclusively for Miscellaneous Lighting Service and Retail Customer did not reimburse Company for construction cost (applies only to installations existing as of 1-1-2002).

**OTHER PROVISIONS**

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company based on the kWh within that municipality and who have signed an appropriate Franchise Agreement.

Acceptable Lamp Types for Installation. For Miscellaneous Lighting Service, the Company no longer installs Customer Owned Fixtures that use mercury vapor or metal halide lighting. Only Customer Owned Fixtures using high pressure sodium or LED lighting are accepted by Company for installation. Existing mercury vapor and metal halide installations (whether Customer Owned Installations or Company Owned Installations) will be converted to the appropriate high pressure sodium or LED equivalent from time to time during the normal course of maintenance when individual lamps burn out.

Revision Number: 21<sup>st</sup> 22ndEffective: 04/15/23 xx/xx/xx

## Chapter 6: Company Specific Items

Sheet No. 6.6

Applicable: Entire Service Area

CNP 8037

Mercury vapor Guard Lighting installations with 7,800 lumen lamps will be converted to 9,500 lumen high pressure sodium, at no up-front cost to the Retail Customer.

LED Lumen Levels. By choosing an LED miscellaneous lighting option, Retail Customer (1) acknowledges that there will be variances in lumen levels and energy consumption between individual LED lamps and between ~~the~~ an LED Lamp and the applicable lumen and watt levels for the other lamp types set forth in the table above, and (2) agrees to not hold Company liable for any variations in LED Lamp performance.

**INSTALLATION AND MAINTENANCE FOR CUSTOMER OWNED FIXTURES**

Company will install and maintain the lighting fixture(s) served hereunder. For all Miscellaneous Lighting fixture installations except Guard Lighting fixtures, the Company will provide for each fixture the bulb and the photoelectric relay at the time of installation. Company will replace burned out lamps and make other maintenance repairs during Company's regular working hours at Company's expense, but with no adjustment of payments hereunder due to outage. Maintenance includes replacement of burned-out lamps (bulbs) and malfunctioning photoelectric relays.

Damages due to vandalism, storms, accidents or manufacturing defects are not included under maintenance. Generally, Company will make maintenance repairs under this tariff within 72 hours after notification by the Retail Customer or REP.

The Retail Customer will be charged a one-time fee per lighting fixture to cover the Company's standard installation as detailed below. Standard installation consists of installing the lighting fixture on an existing wooden distribution pole and connecting service supplied from an existing or new overhead secondary conductor on the pole as detailed below. Standard installations are made during normal Company business hours. The charges below include both the labor to install and eventually remove fixtures. Any additional construction and/or cost required to provide service will be at the Retail Customer's expense, for an additional charge. Any additional facilities so required will be owned, installed and maintained by the Company.

Retail Customer or REP must purchase/provide all lighting fixtures. Only un-metered lighting fixtures meeting Company Service Standards and specifications will be allowed under this tariff. The Retail Customer or REP will own the lighting fixture.

CNP 8027

**6.1.1.6 OTHER CHARGES****6.1.1.6.3 RIDER TCRF - TRANSMISSION COST RECOVERY FACTOR****APPLICABILITY**

Each Retail Customer connected to the Company's transmission or distribution system will be assessed a nonbypassable transmission service charge adjustment pursuant to this rider. The charges derived herein, pursuant to Substantive Rule §25.193, are necessitated by a change in a transmission service provider's wholesale transmission rate subsequent to Commission approval of the Company's base rate charge for transmission service.

**MONTHLY RATE**

The REP, on behalf of the Retail Customer, will be assessed this transmission service charge adjustment based on the monthly per unit cost (TCRF) multiplied times the Retail Customer's appropriate monthly billing determinant (kWh, 4 CP kVA or NCP kVA).

The TCRF shall be calculated for each rate according to the following formula:

**TCRF =**

$$\frac{\left\{ \sum_{i=1}^N (NWTR_i * NL_i) - \sum_{i=1}^N (BWTR_i * NL_i) \right\} * 1/2 * ALLOC \} + ADJ}{BD}$$

Where:

- TCRF** = Transmission Cost Recovery Factor in dollars per kWh, dollars per 4 CP kVA or dollars per NCP kVA to be used for billing for each listed rate schedule. The rate schedules are listed under "BD" below.
- NWTR<sub>i</sub>** = The new wholesale transmission rate of a TSP approved by the Commission by order or pursuant to Commission rules, since the DSP's last rate case;
- BWTR<sub>i</sub>** = The base wholesale transmission rate of the TSP represented in the NWTR<sub>i</sub>, used to develop the retail transmission charges of the Company, in the Company's last rate case.
- NL<sub>i</sub>** = The Company's individual 4CP load component of the total ERCOT 4CP load information used to develop the NWTR<sub>i</sub>;

## Chapter 6: Company Specific Items

Sheet No. 6.13

Page 2 of 3

CenterPoint Energy Houston Electric, LLC

Applicable: Entire Service Area

CNP 8027

ALLOC = The class allocator approved by the Commission to allocate the transmission revenue requirement among classes in the Company's last rate case, unless otherwise ordered by the Commission;

The Allocation Factor for each listed rate schedule is as follows:

Residential Service	<u>48.92384747</u> <del>47.6096</del> %
Secondary Service Less Than or Equal to 10 kVA	<u>0.64860834</u> <del>0.8349</del> %
Secondary Service Greater Than 10 kVA	<u>29.02753468</u> <del>34.6862</del> %
Primary Service	<u>3.08463409</u> <del>5</del> %
Transmission Service	<u>18.31551345</u> <del>13.4597</del> %
Street Lighting Service	0.00%
Miscellaneous Lighting Service	0.00%

$$ADJ = \sum_{p=1}^6 \left\{ EXP_p - (REV_p - ADJP1_p - ADJP2_p) \right\}$$

Where:

ADJ = Adjustment of the rate class TCRF;

EXP<sub>p</sub> = Transmission expenses not included in base rates for period p;

REV<sub>p</sub> = TCRF revenue for period p;

ADJP1 = 1/6<sup>th</sup> of ADJ calculated in the previous TCRF update for the periods 5 and 6;

ADJP2 = 1/6<sup>th</sup> of ADJ calculated in the second previous TCRF update for the periods 1 through 4.

BD = Each class' billing determinant (kWh, 4 CP kVA, or NCP kVA) for the prior March to August six month period for the March update and prior September to February six month period for the September update.

**TERMS OF SERVICE**

**Type of Service.** The standard Delivery Service under this Rate Schedule will be single-phase, 60 hertz, at the Company's standard Secondary Distribution Voltage level for this type of service as described in Section 6.2.2 of this Tariff and in the Company's Service Standards. Three-phase service is generally not available for Residential Purposes. Retail Customers desiring three-phase service for Residential Purposes should check with a Company representative to determine if three-phase service is available. Facilities for three-phase service under this Rate Schedule are Non-Standard Facilities as defined in the Company's Construction Services Policy.

**Metering Equipment.** Delivery Service under this Rate Schedule will be metered using Company's Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities.

**Construction Services.** Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

**Residential Service to Multiple Dwellings.** Where more than four Individual Private Dwellings in an apartment or other residential building are served through one Meter, billing will be under the applicable non-residential Rate Schedule.

**Municipal Account Franchise Credit.** A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company based on the kWh delivered within that municipality and who have signed an appropriate Franchise Agreement.

**Reclassification for Non-Residential Purposes.** If the Company determines that a significant portion of the Delivery Service provided under this Residential Service Rate Schedule is used for non-Residential Purposes, then the appropriate non-residential Rate Schedule shall be applicable to all the Delivery Service provided. However, if the Retail Customer's wiring is so arranged that

CNP 8037

**TERMS OF SERVICE**

Type of Service. The standard Delivery Service under this Rate Schedule will be single-phase, 60 hertz, at the Company's standard Secondary Distribution Voltage level for this type of service as described in Section 6.2.2 of this Tariff and in the Company's Service Standards. Facilities for three-phase service under this Rate Schedule are Non-Standard Facilities as defined in the Company's Construction Services Policy.

Metering Equipment. Except for Unmetered Service described below, Delivery Service under this Rate Schedule will be metered using Company's Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities.

Construction Services. Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

Peak Demand Requirement. This Rate Schedule is applicable only to Retail Customers whose peak demand for the current month is 10 kVA or less, as measured in the Retail Customer's fifteen-minute period of highest demand, and whose peak demand has not exceeded 10 kVA in any of the previous eleven months. If, after taking Delivery Service under this Rate Schedule, Retail Customer's monthly peak demand is greater than 10 kVA, Retail Customer will be placed on the *Secondary Service Greater Than 10 kVA* Rate Schedule for a period of not less than twelve months.

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company based on the kWh delivered within that municipality and who have signed an appropriate Franchise Agreement.

Unmetered Service. Unmetered Service is available under this Rate Schedule for non-residential, non-lighting Delivery Service at the discretion of the Company, Competitive Retailer, and Retail Customer, in limited situations when metering equipment is impractical or disproportionately expensive, and when the Retail Customer's electric load can be reasonably estimated or predicted from the nameplate or engineering studies of the installed equipment. Special protective devices may be required to be installed and/or paid for by customer. Provision of Unmetered Service under this Rate Schedule will require an agreement that includes certification by Retail Customer on at least an annual basis of the number of installed devices and specific location of each device. Company will calculate billing determinants for Unmetered Service based on a 100 percent load

Revision Number: 20th

Effective: xx/xx/xx

**TERMS OF SERVICE****DETERMINATION OF BILLING DEMAND FOR TRANSMISSION SYSTEM CHARGES**

Application of IDR or IDR Capable AMS Metered Charges. The IDR or IDR Capable AMS Metered charges listed in the Monthly Rate section of this Rate Schedule are applicable to Retail Customers who have established an NCP demand greater than 700 kVA in any previous billing month, and to Retail Customers who were billed on a 4CP kVA basis prior to the effective date of this Rate Schedule, regardless of whether their Meter is an IDR, IDR Capable AMS Meter, a Standard Meter or other Meter.

Determination of NCP kVA. The NCP kVA applicable under the Monthly Rate section shall be the kVA supplied during the 15 minute period of maximum use during the billing month.

Determination of 4 CP kVA. The 4 CP kVA applicable under the Monthly Rate section shall be the average of the Retail Customer's integrated 15 minute demands at the time of the monthly ERCOT system 15 minute peak demand for the months of June, July, August and September of the previous calendar year. The Retail Customer's average 4CP demand will be updated effective with the February billing month of each year and remain fixed for a year. Retail Customer's previous metered usage under this or any other Rate Schedule will be used, as needed, in determining the billing determinants under the Monthly Rate section. Retail Customers without previous history on which to determine their 4 CP kVA will be billed at the applicable NCP rate under the "Transmission System Charge" using the Retail Customer's NCP kVA.

**DETERMINATION OF BILLING DEMAND FOR DISTRIBUTION SYSTEM CHARGES**

**Determination of Billing kVA.** The Billing kVA applicable to the Distribution System Charge shall be the NCP kVA for the current billing month.

**OTHER PROVISIONS**

**Type of Service.** The standard Delivery Service under this Rate Schedule will be single or three-phase, 60 hertz, at the Company's standard Secondary Distribution Voltage level for this type of service as described in Section 6.2.2 of this Tariff and in the Company's Service Standards.

**Metering Equipment.** Delivery Service under this Rate Schedule will be metered using Company's Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities.

**Construction Services.** Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

**Peak Demand Requirement.** This Rate Schedule is applicable only to Retail Customers whose peak demand for the current month is greater than 10 kVA, as measured in the Retail Customer's fifteen-minute period of highest demand, or whose peak demand exceeded 10 kVA in any of the previous eleven months.

**Temporary Service.** This Rate Schedule is also applicable to Retail Customers who need Delivery Service at Secondary Distribution Voltage levels on a temporary basis for construction activities, for emergency shelters and temporary housing facilities managed by the Federal Emergency Management Agency or other state or federal agency after a natural or other disaster, and for other temporary facilities or purposes as determined by Company. The Company's construction of Delivery System facilities for the provision of such temporary Delivery Service is subject to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

**Sub-Metering.** The Electric Power and Energy delivered may not be re-metered or sub-metered by the Retail Customer for resale except pursuant to lawful sub-metering regulations of Applicable Legal Authorities.

**Municipal Account Franchise Credit.** A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise

CNP 8037

fee upon the Company based on the Billing kVA within that municipality and who have signed an appropriate Franchise Agreement.

Adjustment To The Charges Applied To Retail Customer's Demand Measurement. If data to determine the Retail Customer's *Demand Measurement* becomes no longer available, the Company will determine a *Conversion Factor* which will be used as an adjustment to all per unit charges that will then be applied to the *New Demand Measurement*. *Demand Measurement* shall include the Billing kVA, the 4 CP kVA, NCP kVA or any other demand measurement required for billing under this Rate Schedule or any applicable rider(s) or any other applicable schedule(s). *New Demand Measurement* shall be the billing determinants which replace the *Demand Measurement*. The *Conversion Factor* will apply to unit prices per kVA such that when applied to the *New Demand Measurement*, the revenue derived by the Company under demand based charges shall be unaffected by such lack of data.

This adjustment may become necessary because of changes in metering capabilities, such as, Meters that record and /or measure kW with no ability to determine kVA or Meters which meter data in intervals other than 15 minutes. This adjustment also may become necessary due to changes in rules, laws, procedures or other directives which might dictate or recommend that Electric Power and Energy, electric power related transactions, wire charges, nonbypassable charges and/or other transactions measure demand in a way that is inconsistent with the definitions and procedures stated in the Company's Tariff. This adjustment is applicable not only in the instances enumerated above but also for any and all other changes in *Demand Measurement* which would prevent the Company from obtaining the necessary data to determine the kVA quantities defined in this Rate Schedule, applicable Riders and other applicable schedules.

The Conversion Factor shall render the Company revenue neutral to any change in *Demand Measurement* as described above.

On-Site Generation. Delivery Service under this Rate Schedule to a Retail Customer with on-site distributed generation (as defined in section 25.211 of the Commission's rules) may also be subject to the terms, conditions, fees and charges set out in Section 6.1.2.4 of this Tariff, regarding the interconnection and parallel operation of distributed generation.

**NOTICE**

This Rate Schedule is subject to the Company's Tariff and Applicable Legal Authorities.

**TERMS OF SERVICE****DETERMINATION OF BILLING DEMAND FOR TRANSMISSION SYSTEM CHARGES**

Application of IDR or IDR Capable AMS Metered Charges. The IDR or IDR Capable AMS Metered charges listed in the Monthly Rate section of this Rate Schedule are applicable to Retail Customers who have established an NCP demand greater than 700 kVA in any previous billing month, and to Retail Customers who were billed on a 4CP kVA basis prior to the effective date of this Rate Schedule, regardless of whether their Meter is an IDR, IDR Capable AMS Meter, a Standard Meter or other Meter.

Determination of NCP kVA. The NCP kVA applicable under the Monthly Rate section shall be the kVA supplied during the 15-minute period of maximum use during the billing month.

Determination of 4 CP kVA. The 4 CP kVA applicable under the Monthly Rate section shall be the average of the Retail Customer's integrated 15 minute demands at the time of the monthly ERCOT system 15 minute peak demand for the months of June, July, August and September of the previous calendar year. The Retail Customer's average 4CP demand will be updated effective with the February billing month of each year and remain fixed for a year. Retail Customer's previous metered usage under this or any other Rate Schedule will be used, as needed, in determining the billing determinants under the Monthly Rate section. Retail Customers without previous history on which to determine their 4 CP kVA will be billed at the applicable NCP rate under the "Transmission System Charge" using the Retail Customer's NCP kVA.

Revision Number: 18<sup>th</sup>

Effective: xx/xx/xx

CNP 8037

DETERMINATION OF BILLING DEMAND FOR DISTRIBUTION SYSTEM CHARGES

Determination of Billing kVA. For loads whose maximum NCP kVA established in the 11 months preceding the current billing month is less than or equal to 20 kVA, the Billing kVA applicable to the Distribution System Charge shall be the NCP kVA for the current billing month. For all other loads, the Billing kVA applicable to the Distribution System Charge shall be the higher of the NCP kVA for the current billing month or 80% of the highest monthly NCP kVA established in the 11 months preceding the current billing month (80% ratchet). The 80% ratchet shall not apply to seasonal agricultural Retail Customers.

OTHER PROVISIONS

Type of Service. The standard Delivery Service under this Rate Schedule will be single or three-phase, 60 hertz, at the Company's standard Primary Distribution Voltage levels described in Section 6.2.2 of this Tariff and in the Service Standards.

Metering Equipment. Delivery Service under this Rate Schedule will be metered using Company's Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities.

Construction Services. Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

Temporary Service. This rate schedule is also applicable to Retail Customers who need Delivery Service at Primary Distribution Voltage levels on a temporary basis for construction activities, for emergency shelters and temporary housing facilities managed by the Federal Emergency Management Agency or other state or federal agency after a natural or other disaster, and for other temporary facilities or purposes as determined by Company. The Company's construction of Delivery System facilities for the provision of such temporary Delivery Service is subject to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

Sub-Metering. The Electric Power and Energy delivered may not be re-metered or sub-metered by the Retail Customer for resale except pursuant to lawful sub-metering regulations of Applicable Legal Authorities.

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company.

Revision Number: 18<sup>th</sup>

Effective: xx/xx/xx

CNP 8037

based on the Billing kVA within that municipality and who have signed an appropriate Franchise Agreement.

Adjustment To The Charges Applied To Retail Customer's Demand Measurement. If data to determine the Retail Customer's *Demand Measurement* becomes no longer available, the Company will determine a *Conversion Factor* which will be used as an adjustment to all per unit charges that will then be applied to the *New Demand Measurement*. *Demand Measurement* shall include the Billing kVA, the 4 CP kVA, NCP kVA or any other demand measurement required for billing under this Rate Schedule or any applicable Rider(s) or any other applicable schedule(s). *New Demand Measurement* shall be the billing determinants which replace the *Demand Measurement*. The *Conversion Factor* will apply to unit prices per kVA such that when applied to the *New Demand Measurement*, the revenue derived by the Company under demand based charges shall be unaffected by such lack of data.

This adjustment may become necessary because of changes in metering capabilities, such as, Meters that record and/or measure kW with no ability to determine kVA or Meters which meter data in intervals other than 15 minutes. This adjustment also may become necessary due to changes in rules, laws, procedures or other directives which might dictate or recommend that Electric Power and Energy, electric power related transactions, wire charges, nonbypassable charges and/or other transactions measure demand in a way that is inconsistent with the definitions and procedures stated in the Company's Tariff. This adjustment is applicable not only in the instances enumerated above but also for any and all other changes in *Demand Measurement* which would prevent the Company from obtaining the necessary data to determine the kVA quantities defined in this Rate Schedule, applicable Riders and other applicable schedules.

The Conversion Factor shall render the Company revenue neutral to any change in *Demand Measurement* as described above.

Metering Adjustment. The Company may at its option measure service on the secondary side of the Retail Customer's transformers in which event the kVA and kWh recorded by the Billing Meter will be adjusted to compensate for transformer losses as follows: (1) where the Retail Customer's installed substation capacity is 600 kVA or less, the kVA will be increased by 2% and the kWh will be increased by 3%; or (2) where the Retail Customer's installed substation capacity is in excess of 600 kVA, the kVA and kWh will be increased by proper respective adjustments based upon data furnished by the manufacturer. In the event the manufacturer is unable to supply the necessary data, the adjustment will be based on tests conducted on the Retail Customer's transformers by the Company.

On-Site Generation. Delivery Service under this Rate Schedule to a Retail Customer with on-site distributed generation (as defined in section 25.211 of the Commission's rules) may also be subject to the terms, conditions, fees and charges set out in Section 6.1.2.4 of this Tariff, regarding the interconnection and parallel operation of distributed generation.

**NOTICE**

This Rate Schedule is subject to the Company's Tariff and Applicable Legal Authorities.

**TERMS OF SERVICE****DETERMINATION OF BILLING DEMAND FOR TRANSMISSION SYSTEM CHARGES AND  
DISTRIBUTION SYSTEM CHARGES**

Determination of NCP kVA. The NCP kVA applicable under the Monthly Rate section shall be the kVA supplied during the 15 minute period of maximum use during the billing month.

Determination Of 4 CP kVA. The 4 CP kVA applicable under the Monthly Rate section shall be the average of the Retail Customer's integrated 15 minute demands at the time of the monthly ERCOT system 15-minute peak demand for the months of June, July, August and September of the previous calendar year. The Retail Customer's average 4CP demand will be updated effective with the February billing month of each year and remain fixed for a year. Retail Customer's previous metered usage under this or any other rate schedule will be used, as needed, in determining the billing determinants under the Monthly Rate section. Retail Customers without previous history on which to determine their 4 CP kVA will be billed based on estimated 4 CP kVA in accordance with the following procedures:

- (a) Retail Customers having IDR data for fewer than 4 CP kVA, but at least 2 CP kVA, will be billed based on the average of the actual CP kVA, so long as the CP kVA are representative of the Retail Customer's expected load, as derived from engineering estimates. If the CP kVA are not representative of the expected load,

Revision Number: 18<sup>th</sup>

Effective: xx/xx/xx

CenterPoint Energy Houston Electric, LLC

Applicable: Entire Service Area

CNP 8037

the estimated 4 CP kVA will be set based on mutual agreement between the Retail Customer and the Company.

- (b) Retail Customers that do not have at least 2 CP kVA will be billed by estimating the Retail Customer's 4 CP kVA demand by applying a class coincidence factor to the Retail Customer's NCP kVA, using the formula:

$$\text{Estimated 4 CP kVA} = (\text{NCP kVA} * \text{TCCF})$$

Where:

NCP kVA is the highest 15-minute integrated demand of an individual Retail Customer served at transmission voltage during the month; and

TCCF is the transmission class coincidence factor for the months June, July, August, and September calculated from the Company's most recent general rate case proceeding using the following formula:

$$\text{TCCF} = \frac{\sum \text{Class CP}_i \text{ kVA for June, July, August, September}}{\sum \text{Class NCP kVA for June, July, August, September}} = 0.873222$$

Where:

Class CP kVA is the transmission voltage rate class' 15-minute demand at the time of the ERCOT CP and Class NCP kVA is the transmission voltage class' maximum 15-minute demand during a month.

### OTHER PROVISIONS

Type of Service. The standard Delivery Service under this Rate Schedule will be three-phase, 60 hertz, at the Company's standard Transmission Voltage levels described in Section 6.2.2 of this Tariff and in the Service Standards.

Metering Equipment. Delivery Service under this Rate Schedule will be metered using Company's Standard Meter provided for this type of Delivery Service. Any other metering option(s) requested by Retail Customer will be provided at an additional charge and/or will be provided by a Meter Owner other than the Company pursuant to Applicable Legal Authorities. The Company may install remote metering equipment to obtain information with which to determine the amount of the monthly bill. Retail Customer may have metering instruments installed to check the service supplied under this Rate Schedule in accordance with the provisions of the Tariff.

Revision Number: 18<sup>th</sup>

Effective: xx/xx/xx

## Chapter 6: Company Specific Items

CNP 8037

Construction Services. Where Construction Services are required to initiate Delivery Service under this Rate Schedule, additional charges and special contract arrangements may be required prior to Delivery Service being furnished, pursuant to the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff.

Customer Load Study Charge. Company may conduct a load study for Retail Customers requesting Delivery Service under this Rate Schedule for a new load or load addition of 10 MW or more, and Company will charge, and Retail Customer must pay, an additional charge of \$50,000.00 for the load study. The Company will waive this load study requirement and study fee for load additions of less than 10 MW, unless Company or ERCOT determines that a load study is required prior to connecting the additional load of less than 10 MW to the Transmission Voltage System. Additionally, if Company or ERCOT require a stability study to be performed, an additional charge of \$50,000.00 will be applied to Retail Customer, for a total of \$100,000.00.

Retail Customer Responsibilities. The Retail Customer shall own, operate, and maintain all facilities (except Company owned Billing Meter) necessary to receive three-phase, 60 hertz alternating current service at 60,000 volts or higher. Each Retail Customer served at Transmission Voltage shall comply with Company's operating requirements for transmission customers.

Sub-Metering. The Electric Power and Energy delivered under this Rate Schedule may not be re-metered or sub-metered by the Retail Customer for resale or sharing except pursuant to lawful sub-metering regulations of Applicable Legal Authorities.

On-Site Generation. If Retail Customer taking Delivery Service under this Rate Schedule has on-site electric generating capacity installed, additional contract arrangements may be required pursuant to section 5 of the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff if less than 10 MW or pursuant to ERCOT guidelines and procedures if 10 MW or greater.

Municipal Account Franchise Credit. A credit equal to the amount of franchise fees included in the Transmission and Distribution Charges will be applied to municipal accounts receiving service within the incorporated limits of such municipality which imposes a municipal franchise fee upon the Company based on the kWh delivered within that municipality and who have signed an appropriate Franchise Agreement.

Adjustment To The Charges Applied To Retail Customer's Demand Measurement. If data to determine the Retail Customer's *Demand Measurement* becomes no longer available, the Company will determine a *Conversion Factor* which will be used as an adjustment to all per unit charges that will then be applied to the *New Demand Measurement*. *Demand Measurement* shall include the Billing kVA, the 4 CP kVA, NCP kVA or any other demand measurement required for billing under this rate schedule or any applicable rider(s) or any other applicable schedule(s). *New Demand Measurement* shall be the billing determinants which replace the *Demand Measurement*. The *Conversion Factor* will apply to unit prices per kVA such that when applied to the *New Demand*

CNP 8037

*Measurement*, the revenue derived by the Company under demand based charges shall be unaffected by such lack of data.

This adjustment may become necessary because of changes in metering capabilities, such as, meters that record and /or measure kW with no ability to determine kVA or meters which meter data in intervals other than 15 minutes. This adjustment also may become necessary due to changes in rules, laws, procedures other directives which might dictate or recommend that electric power, electric power related transactions, wire charges, nonbypassable charges and/or other transactions measure demand in a way that is inconsistent with the definitions and procedures stated in the Company's Tariff. This adjustment is applicable not only in the instances enumerated above but also for any and all other changes in *Demand Measurement* which would prevent the Company from obtaining the necessary data to determine the kVA quantities defined in this rate schedule, applicable riders and other applicable schedules.

The Conversion Factor shall render the Company revenue neutral to any change in *Demand Measurement* as described above.

**Metering Adjustment.** The Company may at its option measure service on the low voltage side of the Retail Customer's transformers in which event the kVA and kWh recorded by the Billing Meter will be adjusted to compensate for transformer losses on the basis of data furnished by the manufacturer of the Retail Customer's transformers. When the manufacturer is unable to supply the necessary data the adjustment will be based on tests conducted by the Company on the Retail Customer's transformers.

**NOTICE**

This Rate Schedule is subject to the Company's Tariff and Applicable Legal Authorities.

## Chapter 6: Company Specific Items

Sheet No. 6.6  
Page 1 of 10CenterPoint Energy Houston Electric, LLC  
Applicable: Entire Service Area

CNP 8037

**6.1.1.1.6 LIGHTING SERVICES**  
(Street Lighting and Miscellaneous Lighting Services)**STREET LIGHTING SERVICE****AVAILABILITY**

Street lighting service is available to cities, governmental agencies, real estate developers and other groups (herein referred to as Retail Customers) requesting the installation of Company-owned and maintained street lighting systems along public streets, roadways or other public access areas in accordance with Section 6.1.2.2, Construction Services, in this Tariff. Street lighting service is not applicable to privately-owned street lighting systems. Privately-owned street lighting systems may be eligible for Delivery Service under the Company's applicable rate schedule for Secondary or Primary Service.

**TYPE OF SERVICE**

Street lighting service consists of the installation of Company-owned street lights, fixtures, luminaires and lamps (collectively, Lamps) and (if requested by Retail Customer) ornamental standards along public streets, roadways or other public access areas in accordance with section 6 of the Company's Construction Services Policy in Section 6.1.2.2 of this Tariff, as well as the delivery of Electric Power and Energy at Company's standard Secondary Distribution Voltages to, and the maintenance and replacement of, such installations pursuant to the rates set forth in this Rate Schedule. If ornamental standards are not requested by Retail Customer, the Lamp installations will be mounted on the Company's existing distribution poles, if available, and served by overhead conductors. The Company's standard Lamp type for all street lighting service installations and replacements is Light Emitting Diode (LED). A Retail Customer's request for a non-standard Lamp type will be subject to the availability of the Lamp type in Company's inventory. The Company is no longer Procuring non-standard Lamp types for its inventory.

Street lighting service will be provided at various voltages as determined by the Company. Delivery Service under this Rate Schedule is an Unmetered Service. Company will install, own and maintain the street lighting service installations provided hereunder. Company's street lighting service is built to NESC standards. At the request of Customer and at Company's discretion, Company may build to other standards, with Customer being responsible for any difference in cost. All street Lamps, including LED Lamps, will burn out and/or dim over time, and therefore the lumens delivered by a street Lamp will vary over time and will vary from Lamp to Lamp. Company will replace burned out street Lamps, and/or make maintenance repairs during regular working hours, at its own cost and expense and will generally have the lighting service restored within 72 hours after notification by the Retail Customer, but with no adjustment of payments hereunder due to outage or varying levels of lumens. Street Lamps furnished hereunder shall operate under normal conditions from approximately thirty minutes after sunset to approximately thirty minutes before sunrise every night in the year and the assumed total time of operations will be approximately four thousand (4,000) hours each year for each light furnished.

## MONTHLY RATE

## I. Transmission and Distribution Charges

The monthly charges listed in the table below cover the provision of Delivery Service to street lighting systems requested by Retail Customer and installed by Company pursuant to this Rate Schedule, including the maintenance but excluding the installation of those systems. Charges for the installation of street lighting systems are governed by the Construction Services Policy in Section 6.1.2.2 of this Tariff.

In addition to the following monthly charges per Lamp, an additional \$1.07 per month will be charged for each Lamp with a break-away base if requested by Retail Customer and installed by Company. | I
