

1 Q PLEASE DESCRIBE THE EFFECT OF THESE RISK REDUCTION FACTORS,
2 INCLUDING UTILIZATION OF EXPENSE AND CAPITAL TRACKING
3 MECHANISMS, IN MORE DETAIL.

4 A Use of trackers can reduce a utility's cost recovery risk because it allows a utility to
5 adjust prices to customers outside of a traditional rate case to improve earnings.
6 Typically, these trackers reflect line item specific costs. In combination with base rates,
7 the use of trackers may allow for rate increases without a full consideration of whether
8 or not cost increases to certain line item amounts are offset by cost decreases to other
9 line item cost of service items. This erodes customers' protections of paying rates that
10 reflect efficient costs.

11 In addition, these mechanisms can allow for increases in prices on an expedited
12 basis, and reduce the lag utilities face in adjusting their regulatory mechanisms to
13 reflect their changes in cost of service.

14 Q PLEASE EXPLAIN THE RELATIONSHIP BETWEEN THE REDUCTION OF THE
15 UTILITY'S RISK AS THE RESULT OF TRACKERS AND ITS CORRESPONDING
16 EFFECT ON RATEPAYERS.

17 A Importantly, the changes in investor risk discussed above are not created by eliminating
18 the risk altogether, as explained previously. Rather, the surcharge mechanisms
19 typically shift cost recovery risk from investors to ratepayers. Because ratepayers will
20 be obligated to pay for increased costs through trackers, without consideration of
21 decreases to other cost of service components, customers are faced with paying
22 increased bills composed of both base rates and trackers, where the Company's total
23 cost of service may not actually be increasing. Rather, only the costs recovered
24 through the tracker mechanism costs may be increasing. As such, customer

1 protections are significantly eroded with the use of trackers, and cost recovery risk is
2 shifted from the utility to prove a price increase is needed, to ratepayers who are
3 obligated to pay line item cost increases without any proof that an increase to the
4 monthly utility bill is justified. If the market principle that the entity that takes the risk
5 should be compensated for taking the risk is properly applied, then such a transfer of
6 risk should be reflected in a utility's bond rating and its return on equity.

7 IV.G.1. Flotation Costs

8 Q DID MS. BULKLEY INCLUDE A FLOTATION COST ADJUSTMENT IN HER
9 RECOMMENDED RETURN FOR CEHE?

10 A Ms. Bulkley did not make an explicit adjustment to account for flotation costs because
11 the Commission has not authorized recovery in prior regulatory proceedings. However,
12 she quantifies the impact of flotation costs in her Exhibit AEB-9.⁷⁸ Ms. Bulkley
13 calculated an upward adjustment of 14 basis points to her return results to compensate
14 for flotation costs. She developed her flotation cost adjustment by observing the cost
15 CenterPoint Energy, Inc. (CEHE's parent company) incurred in issuing equity securities
16 in June 2010 and September 2018. The costs incurred on these two historical
17 issuances averaged around 2.92% of the issuance amount.

18 Next, Ms. Bulkley developed a constant growth DCF model for the proxy group
19 with and without issuance costs to derive her average flotation cost adjustment of 13
20 basis points.⁷⁹

⁷⁸Bulkley Direct Testimony at 41-42.

⁷⁹Exhibit AEB-9.

1 Q IS MS. BULKLEY'S FLOTATION COST ADJUSTMENT REASONABLE?

2 A No. While she does not make a specific adjustment, Ms. Bulkley's calculation of
3 flotation costs is not reasonable nor justified because it is not based on the recovery of
4 prudent and verifiable actual flotation costs incurred by CEHE, which I understand has
5 long been the standard applied by the Commission in determining whether a flotation
6 cost adjustment is appropriate. That is, the Commission, in determining whether a
7 flotation cost adjustment is appropriate, considers whether the cost is actually incurred
8 by the utility and is reasonable. CenterPoint Energy, Inc. receives dividend payments
9 from its various subsidiaries and can do whatever it wants with that capital, such as
10 redistributing it to another subsidiary. Paid-in capital at CEHE can also be derived from
11 debt capital issued by CenterPoint Energy, Inc. Ms. Bulkley has failed to show that the
12 entirety of CEHE's paid-in capital portion of its common equity balance was derived
13 from common equity issuances at its parent, or that CEHE itself incurred any actual
14 flotation costs, much less shown that any actual flotation costs which have been
15 incurred by CEHE are reasonable.

16 Because she does not show that her consideration of flotation costs reflects
17 CEHE's actual and verifiable flotation expenses, there are no means of verifying
18 whether Ms. Bulkley's assessment of such costs is reasonable or appropriate. Stated
19 differently, Ms. Bulkley's flotation costs estimate should continue to be rejected as it is
20 not based on known and measurable CEHE costs. Therefore, the Commission should
21 reject any flotation cost return on equity adder, explicit or implicit, for CEHE.

1 **IV.H. Capital Market Conditions**

2 Q DID MS. BULKLEY ALSO OFFER AN ASSESSMENT OF CURRENT MARKET
3 CONDITIONS IN SUPPORT OF HER RECOMMENDED RETURN ON EQUITY?

4 A Yes. Ms. Bulkley identifies several factors that she believes are helpful in evaluating
5 the capital market environment and investor sentiment during the post-pandemic
6 recovery period, including inflation, the Federal Reserve's monetary policy, higher
7 interest rates, and utility stocks' performance.⁸⁰

8 Q DO YOU BELIEVE THAT MS. BULKLEY'S USE OF THESE MARKET SENTIMENTS
9 SUPPORTS HER FINDINGS THAT CEHE's MARKET COST OF EQUITY IS
10 CURRENTLY 10.40%?

11 A No. A fair analysis of utility securities shows the market generally regards utility
12 securities as low-risk investment instruments and supports a finding that utilities' cost
13 of capital is low in today's marketplace.

14 Q WHAT IS YOUR ASSESSMENT OF CURRENT MARKET SENTIMENT FOR UTILITY
15 INVESTMENTS?

16 A Again, the current market sentiment toward utility investments, rather than just general
17 corporate investments, is that the market is placing high value on utility securities,
18 recognizing their low risk and stable characteristics. This is illustrated by current utility
19 bond yield spreads as discussed at length previously. The current strong utility bond
20 valuation is an indication of the market's sentiment that utility bonds are lower risk and
21 are generally regarded as defensive investments by the investment industry.

⁸⁰*Id.* at 17-29.

1 Further, other measures of utility stock valuations also support the conclusion
2 that there is a robust market for utility stocks. As shown on my Exhibit MPG-2, financial
3 valuation measures (e.g., P/E ratio and market price to cash flow ratio) show that utility
4 stock valuation measures are robust.

5 For all these reasons, direct assessments of valuation measures and market
6 sentiment toward utility securities support the credit rating agencies' findings, as quoted
7 above, that the utility industry is largely regarded as a low-risk investment. All of this
8 supports my finding that utilities' market cost of equity is very low in today's very low-
9 cost capital market environment.

10 **Q DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

11 **A Yes, it does.**

Qualifications of Michael P. Gorman

1 Q PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

2 A Michael P. Gorman. My business address is 16690 Swingley Ridge Road, Suite 140,
3 Chesterfield, MO 63017.

4 Q PLEASE STATE YOUR OCCUPATION.

5 A I am a consultant in the field of public utility regulation and a Managing Principal with
6 the firm of Brubaker & Associates, Inc. ("BAI"), energy, economic and regulatory
7 consultants.

8 Q PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND AND WORK
9 EXPERIENCE.

10 A In 1983 I received a Bachelor of Science Degree in Electrical Engineering from
11 Southern Illinois University, and in 1986, I received a Master's Degree in Business
12 Administration with a concentration in Finance from the University of Illinois at
13 Springfield. I have also completed several graduate level economics courses.

14 In August of 1983, I accepted an analyst position with the Illinois Commerce
15 Commission ("ICC"). In this position, I performed a variety of analyses for both formal
16 and informal investigations before the ICC, including: marginal cost of energy, central
17 dispatch, avoided cost of energy, annual system production costs, and working capital.

18 In October of 1986, I was promoted to the position of Senior Analyst. In this position, I
19 assumed the additional responsibilities of technical leader on projects, and my areas
20 of responsibility were expanded to include utility financial modeling and financial
21 analyses.

Appendix A
Direct Testimony of Michael P. Gorman

1 In 1987, I was promoted to Director of the Financial Analysis Department. In
2 this position, I was responsible for all financial analyses conducted by the Staff. Among
3 other things, I conducted analyses and sponsored testimony before the ICC on rate of
4 return, financial integrity, financial modeling and related issues. I also supervised the
5 development of all Staff analyses and testimony on these same issues. In addition, I
6 supervised the Staff's review and recommendations to the Commission concerning
7 utility plans to issue debt and equity securities.

8 In August of 1989, I accepted a position with Merrill-Lynch as a financial
9 consultant. After receiving all required securities licenses, I worked with individual
10 investors and small businesses in evaluating and selecting investments suitable to their
11 requirements.

12 In September of 1990, I accepted a position with Drazen-Brubaker &
13 Associates, Inc. ("DBA"). In April 1995, the firm of Brubaker & Associates, Inc. was
14 formed. It includes most of the former DBA principals and Staff. Since 1990, I have
15 performed various analyses and sponsored testimony on cost of capital, cost/benefits
16 of utility mergers and acquisitions, utility reorganizations, level of operating expenses
17 and rate base, cost of service studies, and analyses relating to industrial jobs and
18 economic development. I also participated in a study used to revise the financial policy
19 for the municipal utility in Kansas City, Kansas.

20 At BAI, I also have extensive experience working with large energy users to
21 distribute and critically evaluate responses to requests for proposals ("RFPs") for
22 electric, steam, and gas energy supply from competitive energy suppliers. These
23 analyses include the evaluation of gas supply and delivery charges, cogeneration
24 and/or combined cycle unit feasibility studies, and the evaluation of third-party

1 asset/supply management agreements. I have participated in rate cases on rate
2 design and class cost of service for electric, natural gas, water and wastewater utilities.
3 I have also analyzed commodity pricing indices and forward pricing methods for third
4 party supply agreements, and have also conducted regional electric market price
5 forecasts.

6 In addition to our main office in St. Louis, the firm also has branch offices in
7 Corpus Christi, Texas; Louisville, Kentucky and Phoenix, Arizona.

8 Q **HAVE YOU EVER TESTIFIED BEFORE A REGULATORY BODY?**

9 A Yes. I have sponsored testimony on cost of capital, revenue requirements, cost of
10 service and other issues before the Federal Energy Regulatory Commission and
11 numerous state regulatory commissions including: Alaska, Arkansas, Arizona,
12 California, Colorado, Delaware, the District of Columbia, Florida, Georgia, Idaho,
13 Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts,
14 Michigan, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, New
15 Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma,
16 Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia,
17 Washington, West Virginia, Wisconsin, Wyoming, and before the provincial regulatory
18 boards in Alberta, Nova Scotia, and Quebec, Canada. I have also sponsored testimony
19 before the Board of Public Utilities in Kansas City, Kansas; presented rate setting
20 position reports to the regulatory board of the municipal utility in Austin, Texas, and Salt
21 River Project, Arizona, on behalf of industrial customers; and negotiated rate disputes
22 for industrial customers of the Municipal Electric Authority of Georgia in the LaGrange,
23 Georgia district.

Appendix A
Direct Testimony of Michael P. Gorman

1 Q PLEASE DESCRIBE ANY PROFESSIONAL REGISTRATIONS OR
2 ORGANIZATIONS TO WHICH YOU BELONG.

3 A I earned the designation of Chartered Financial Analyst ("CFA") from the CFA Institute.
4 The CFA charter was awarded after successfully completing three examinations which
5 covered the subject areas of financial accounting, economics, fixed income and equity
6 valuation and professional and ethical conduct. I am a member of the CFA Institute's
7 Financial Analyst Society.

Sources:

The current year P/E ratio is based on the forward P/E (price over expected earnings per share). All historical year P/E ratios are based on annual average share price over achieved earnings per share.

¹ Data for years 2019 and prior were retrieved from the Value Line Investment Survey Investment Analyzer Software, downloaded on June 18, 2021.

Data for the years 2020 - 2022 was retrieved from Value Line Investment Surveys.

² The Value Line Investment Survey, March 8, April 19, and May 10, 2024.

Note:

³ Based on the average of the high and low price and the projected Cash Flow per share.

Sources:

The current year P/E ratio is based on the forward P/E (price over expected earnings per share). All historical year P/E ratios are based on annual average share price over achieved earnings per share.

¹ Data for years 2019 and prior were retrieved from the Value Line Investment Survey Investment Analyzer Software, downloaded on June 18, 2021.

Data for the years 2020 - 2022 was retrieved from Value Line Investment Surveys.

² The Value Line Investment Survey, March 8, April 19, and May 10, 2024.

Notes:

³ Based on the average of the high and low price and the projected Book Value per share.
