### TWU'S RESPONSE TO OPUC'S FIRST RFI

#### **OPUC 1-13** Please provide the following information:

- a. A detailed breakdown of acquisition-related costs and time incurred by each business unit allocated to TWU by the parent company; and
- b. Any relevant documentation or records that outline the processes for allocating these costs and time to TWU, particularly in relation to acquisition activities.

# **RESPONSE**: a. The only acquisition-related costs and time allocated to TWU by the parent company are related to the Corporate Development function. Please refer to the Direct Testimony of Mujeeb Hafeez for further detail regarding the costs of the Corporate Development function.

b. The costs of the Corporate Development function are allocated to TWU using the three-factor methodology.

Prepared by: Mujeeb Hafeez Sponsored by: Mujeeb Hafeez

APPLICATION OF TEXAS WATER \$ PUBLIC UTILITY COMMISSION UTILITIES, L.P. FOR AUTHORITY TO \$ OF TEXAS

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

To: Public Utility Commission of Texas (Commission), by and through its attorney of record, David Skawin, Legal Division, 1701 N. Congress Avenue, P.O. Box 13326, Austin, Texas 78701.

Texas Water Utilities, L.P. (TWU) files its Responses to Public Utility Commission Staff's First Request for Information (RFI) to TWU received on August 6, 2024. This response is timely filed. Pursuant to 16 Tex. Admin. Code (TAC) § 22.144(c)(2)(F), TWU agrees and stipulates that all parties may treat the responses as if the answers were filed under oath.

Respectfully submitted,

SPENCER FANE, LLP 816 Congress Avenue Suite 1200 Austin, TX 78701 Telephone: (512) 840-4550 Facsimile: (512) 840-4551

ATTORNEYS FOR TEXAS WATER UTILITIES, L.P.

Page 2 of 2

#### **CERTIFICATE OF SERVICE**

I hereby certify that, unless otherwise ordered by the presiding officer, notice of the filing of this document was provided to all parties of record via electronic mail on August 26, 2024, in accordance with the Second Order Suspending Rules, issued in Project No. 50664.

/s/ William A. Faulk, III
William A. Faulk, III

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

Staff 2-1 Please provide a copy of TWU's capitalization policy that was in effect during the test year. If no written capitalization policy exists, please explain the criteria used to determine when an expense is capitalized and included in rate base.

**RESPONSE**: TWU generally follows NARUC's System of Accounts for Water and Wastewater Utilities in determining whether costs should be capitalized, and specifically the Accounting Instructions Nos. 20-32 and Nos. 17-32, respectively.

Prepared by: Brian Bahr Sponsored by: Eric Sabolsice

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RF1

Staff 2-2 Please provide a general ledger to support all test year expenses.

RESPONSE: Please see Attachment Staff 2-2, being provided in native Excel file-format.

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

Staff 2-3 Refer to Schedule II-B-1.1. Please provide this information separated by water

and wastewater system names in Excel format.

**RESPONSE**: Please see *Confidential* Attachment Staff 2-3.

## Attachment Staff 2-3 is *Confidential* and being provided pursuant to the Protective Order

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-4** Refer to Attachment ES-2. Please provide this information separated by water and wastewater system names in Excel format.

RESPONSE: Please refer to Attachment Staff 2-4. Upon review in developing its response to this RFI, TWU discovered that some of the projects listed in Attachment ES-2 were inadvertently mislabeled water/wastewater/both. Though the testimony attachment contains mislabelings, the filed revenue requirement reflects the correct assignment to water and/or wastewater of the projects. In other words, the error is a superficial one, not a substantive one. To address the issue, TWU has added to the table a column with revised water/wastewater/both designations that are consistent with how the projects are designated in TWU's cost of service.

Prepared by: Brian Bahr Sponsored by: Eric Sabolsice

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-5** Refer to Attachment ES-3. Please provide this information separated by water and wastewater system names in Excel format.

RESPONSE: Please refer to Attachment Staff 2-5. Upon review, TWU discovered that some of the projects listed in the attachment were inadvertently mislabeled water/wastewater/both. Though the testimony attachment contains mislabelings, the filed revenue requirement reflects the correct assignment to water and/or wastewater of the projects. In other words, the error is a superficial one, not a substantive one. To address the issue, TWU has added to the table a column with revised water/wastewater/both designations that are consistent with how the projects are designated in TWU's cost of service.

Prepared by: Brian Bahr Sponsored by: Eric Sabolsice

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

STAFF 2-6 Refer to Schedule II-D-1. Please provide a workpaper of this schedule in Excel format with all formulae intact, with the water and wastewater accounts separated by water and wastewater system names and by month for the stated test year O&M expenses.

RESPONSE: Please see Attachment Staff 2-6 for the information responsive to the request and

as agreed to by counsel for TWU and Commission Staff.

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

STAFF 2-7 Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the water materials and supplies expense decreased from \$2,719,511 in 2021, to \$1,931,084 in 2022, and increased to \$2,961,095 in 2023.

RESPONSE: As shown on Schedule II-D-1.1, TWU's total per-book water O&M costs increased from \$22.8 million in 2021 to \$24.2 million in 2022 to \$28.3 million in 2023. Generally, year-over-year increases in O&M costs are due to utility growth and inflationary pressure. TWU's water connection count increased from 32,358 as of December 31, 2021, to 35,181 as of December 31, 2023, an increase of over 8.7%. The national inflation rate between 2021 and 2023 was 12.45%. As stated in the direct testimony of Jeffrey L. McIntyre, "The compound annual growth rate of TWU's O&M expenses from its last rate case (test year ending December 31, 2019) to this rate case (test year ending December 31, 2023) is 1.65%, which compares favorably to average annual inflation during that time of 4.53%."<sup>2</sup> Though the overall O&M costs increase year over year, specific individual accounts may aberrate from this general trend. The primary reason for this aberration in the materials and supplies expense account is because some O&M expenses were booked to NARUC account 675 - Miscellaneous Expenses in 2022 that were booked to different individual NARUC accounts in other years. This is evidenced by the aberration in the opposite direction of NARUC account 675 -In other words, certain costs were booked to the Miscellaneous Expenses. materials and supplies account in 2021 and 2023, but similar costs were booked to miscellaneous expenses in 2022, thereby causing the 2022 NARUC account 675 -Miscellaneous Expenses to appear overstated relative to other years and the materials and supplies expense account to appear understated relative to other years; however, the increase in the account of 8.9% from 2021 to 2023 is reasonable and consistent with the overall trend in O&M costs.

https://www.calculator.net/inflation-calculator.html?cstartingamount1=100&cinmonth1=13&cinyear1=2021&coutmonth1=13&coutyear1=2023&calctype=1&x=Calculate#uscpi

<sup>&</sup>lt;sup>2</sup> Direct Testimony of Jeffrey L. McIntyre at 10:6–9.

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-8** Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the water "other" contractual services expense decreased from \$1,991,045 in 2021, to \$1,483,150 in 2022, and increased to \$4,230,140 in 2023.

RESPONSE: As shown on Schedule II-D-1.1, TWU's total per-book water O&M costs increased from \$22.8 million in 2021 to \$24.2 million in 2022 to \$28.3 million in 2023. Generally, year-over-year increases in O&M costs are due to utility growth and inflationary pressure. TWU's water connection count increased from 32,358 as of December 31, 2021, to 35,181 as of December 31, 2023, an increase of over 8.7%. The national inflation rate between 2021 and 2023 was 12.45%. As stated in the direct testimony of Jeffrey L. McIntyre, "The compound annual growth rate of TWU's O&M expenses from its last rate case (test year ending December 31, 2019) to this rate case (test year ending December 31, 2023) is 1.65%, which compares favorably to average annual inflation during that time of 4.53%."4 Though the overall O&M costs increase year over year, specific individual accounts may aberrate from this general trend. The primary reason for this aberration in the other contract services expense account is because some O&M expenses were booked to NARUC account 675 - Miscellaneous Expenses in 2022 that were booked to different individual NARUC accounts in other years. This is evidenced by the aberration in the opposite direction of NARUC account 675 -Miscellaneous Expenses. In other words, certain costs were booked to the other contract services account in 2021 and 2023, but similar costs were booked to miscellaneous expenses in 2022, thereby causing the 2022 NARUC account 675 -Miscellaneous Expenses to appear overstated relative to other years and the other contract services account to appear understated relative to other years. Additionally, TWU incurred a substantial amount of hauled water costs in 2023 related to the extreme heat and drought conditions (approximately \$742,000). TWU also incurred cost increases in 2023 for the hiring of temporary contractors to assist the finance and accounting departments with processing a backlog of transactional data (e.g., recording assets previously placed into service from construction work in progress account to gross plant in service account).

<sup>3</sup> https://www.calculator.net/inflation-calculator.html?cstartingamount1=100&cinmonth1=13&cinyear1=2021&coutmonth1=13&coutyear1=2023&calctype=1&x=Calculate#uscpi

<sup>&</sup>lt;sup>4</sup> Direct Testimony of Jeffrey L. McIntyre at 10:6-9.

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

STAFF 2-9 Refer to Schedule II-D-1.1. Please provide a detailed statement and to support explaining why the water rental of building/property expense decreased from \$314,251 in 2021, to \$975 in 2022, and increased to \$523,355 in 2023.

RESPONSE: As shown on Schedule II-D-1.1, TWU's total per-book water O&M costs increased from \$22.8 million in 2021 to \$24.2 million in 2022 to \$28.3 million in 2023. Generally, year-over-year increases in O&M costs are due to utility growth and inflationary pressure. TWU's water connection count increased from 32,358 as of December 31, 2021, to 35,181 as of December 31, 2023, an increase of over 8.7%. The national inflation rate between 2021 and 2023 was 12.45%.<sup>5</sup> As stated in the direct testimony of Jeffrey L. McIntyre, "The compound annual growth rate of TWU's O&M expenses from its last rate case (test year ending December 31, 2019) to this rate case (test year ending December 31, 2023) is 1.65%, which compares favorably to average annual inflation during that time of 4.53%."6 Though the overall O&M costs increase year over year, specific individual accounts may aberrate from this general trend. The primary reason for this aberration in the rental of building/property expense account is because some O&M expenses were booked to NARUC account 675 - Miscellaneous Expenses in 2022 that were booked to different individual NARUC accounts in other years. This is evidenced by the aberration in the opposite direction of NARUC account 675 – Miscellaneous Expenses. In other words, certain costs were booked to the rental of building/property account in 2021 and 2023, but similar costs were booked to miscellaneous expenses in 2022, thereby causing the 2022 NARUC account 675 – Miscellaneous Expenses to appear overstated relative to other years and the rental of building/property expense account to appear understated relative to other years. Additionally, TWU experienced an increase in its allocation of office lease expense for its corporate office as a result of the utility's growth and increase in its headcount occupying the building.

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-10** Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the water rental of equipment expense decreased from \$60,534 in 2021, to \$36,426 in 2022, and increased to \$155,806 in 2023.

RESPONSE: As shown on Schedule II-D-1.1, TWU's total per-book water O&M costs increased from \$22.8 million in 2021 to \$24.2 million in 2022 to \$28.3 million in 2023. Generally, year-over-year increases in O&M costs are due to utility growth and inflationary pressure. TWU's water connection count increased from 32,358 as of December 31, 2021, to 35,181 as of December 31, 2023, an increase of over 8.7%. The national inflation rate between 2021 and 2023 was 12.45%. As stated in the direct testimony of Jeffrey L. McIntyre, "The compound annual growth rate of TWU's O&M expenses from its last rate case (test year ending December 31, 2019) to this rate case (test year ending December 31, 2023) is 1.65%, which compares favorably to average annual inflation during that time of 4.53%."8 Though the overall O&M costs increase year over year, specific individual accounts may aberrate from this general trend. The primary reason for this aberration in the rental of equipment expense account is because some O&M expenses were booked to NARUC account 675 - Miscellaneous Expenses in 2022 that were booked to different individual NARUC accounts in other years. This is evidenced by the aberration in the opposite direction of NARUC account 675 -Miscellaneous Expenses. In other words, certain costs were booked to the rental of equipment account in 2021 and 2023, but similar costs were booked to miscellaneous expenses in 2022, thereby causing the 2022 NARUC account 675 -Miscellaneous Expenses to appear overstated relative to other years and the rental of equipment account to appear understated relative to other years. Additionally, upon review in developing its response to this RFI, TWU identified approximately \$92,000 of expenses in 2023 that were booked to rental of equipment that should have been more appropriately booked to account 675 -Miscellaneous Expenses.

<sup>&</sup>lt;sup>7</sup> https://www.calculator.net/inflation-calculator.html?cstartingamount1=100&cinmonth1=13&cinyear1=2021&coutmonth1=13&coutyear1=2023&calctype=1&x=Calculate#uscpi

<sup>&</sup>lt;sup>8</sup> Direct Testimony of Jeffrey L. McIntyre at 10:6–9.

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-11** Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the water transportation expenses decreased from \$718,364 in 2021, to \$673,470 in 2022, and increased to \$979,245 in 2023.

RESPONSE: As shown on Schedule II-D-1.1, TWU's total per-book water O&M costs increased from \$22.8 million in 2021 to \$24.2 million in 2022 to \$28.3 million in 2023. Generally, year-over-year increases in O&M costs are due to utility growth and inflationary pressure. TWU's water connection count increased from 32,358 as of December 31, 2021, to 35,181 as of December 31, 2023, an increase of over 8.7%. The national inflation rate between 2021 and 2023 was 12.45%. As stated in the direct testimony of Jeffrey L. McIntyre, "The compound annual growth rate of TWU's O&M expenses from its last rate case (test year ending December 31, 2019) to this rate case (test year ending December 31, 2023) is 1.65%, which compares favorably to average annual inflation during that time of 4.53%." <sup>10</sup> Though the overall O&M costs increase year over year, specific individual accounts may aberrate from this general trend. The primary reason for this aberration in the transportation expense account is because some O&M expenses were booked to NARUC account 675 - Miscellaneous Expenses in 2022 that were booked to different individual NARUC accounts in other years. This is evidenced by the aberration in the opposite direction of NARUC account 675 – In other words, certain costs were booked to the Miscellaneous Expenses. transportation expense account in 2021 and 2023, but similar costs were booked to miscellaneous expenses in 2022, thereby causing the 2022 NARUC account 675 – Miscellaneous Expenses to appear overstated relative to other years and the transportation expense account to appear understated relative to other years. Additionally, upon review in developing its response to this RFI, TWU identified approximately \$156,000 of transportation expenses in 2023 that were inadvertently included in water transportation expense and should have been booked to wastewater transportation expense. Please see also the response to Staff RFI 2-15.

<sup>&</sup>lt;sup>9</sup> https://www.calculator.net/inflation-calculator.html?cstartingamount1=100&cinmonth1=13&cinyear1=2021&coutmonth1=13&coutyear1=2023&calctype=1&x=Calculate#uscpi

<sup>&</sup>lt;sup>10</sup> Direct Testimony of Jeffrey L. McIntyre at 10:6–9.

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

STAFF 2-12 Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the water advertising expenses decreased from \$35,337 in 2021, to \$22,020 in 2022, and increased to \$130,689 in 2023.

RESPONSE: As shown on Schedule II-D-1.1, TWU's total per-book water O&M costs increased from \$22.8 million in 2021 to \$24.2 million in 2022 to \$28.3 million in 2023. Generally, year-over-year increases in O&M costs are due to utility growth and inflationary pressure. TWU's water connection count increased from 32,358 as of December 31, 2021, to 35,181 as of December 31, 2023, an increase of over 8.7%. The national inflation rate between 2021 and 2023 was 12.45%. As stated in the direct testimony of Jeffrey L. McIntyre, "The compound annual growth rate of TWU's O&M expenses from its last rate case (test year ending December 31, 2019) to this rate case (test year ending December 31, 2023) is 1.65%, which compares favorably to average annual inflation during that time of 4.53%."<sup>12</sup> Though the overall O&M costs increase year over year, specific individual accounts may aberrate from this general trend. The primary reason for this aberration in the advertising expense account is because some O&M expenses were booked to NARUC account 675 - Miscellaneous Expenses in 2022 that were booked to different individual NARUC accounts in other years. This is evidenced by the aberration in the opposite direction of NARUC account 675 -Miscellaneous Expenses. In other words, certain costs were booked to the advertising expense account in 2021 and 2023, but similar costs were booked to miscellaneous expenses in 2022, thereby causing the 2022 NARUC account 675 -Miscellaneous Expenses to appear overstated relative to other years and the advertising expense account to appear understated relative to other years. Additionally, approximately \$50,000 of the increase from 2022 to 2023 is due to TWU's sponsorship of a corporate work study program.

 $<sup>\</sup>frac{11}{\text{https://www.calculator.net/inflation-calculator.html?cstartingamount1=100\&cinmonth1=13\&cinyear1=2021\&coutmonth1=13\&coutyear1=2023\&calctype=1\&x=Calculate\#uscpi}$ 

<sup>12</sup> Direct Testimony of Jeffrey L. McIntyre at 10:6–9.

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-13** Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the water "other" regulatory commission expenses decreased from \$147,996 in 2021, to \$12,720 in 2022, and decreased to \$0 in 2023.

**RESPONSE**: The "other" regulatory commission expenses recorded in 2021 and 2022 inadvertently included rate case expenses associated with Docket No. 50944 and should not have been included in this account. The 2023 test year properly reflects no costs incurred.

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-14** Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the water miscellaneous expenses increased from -\$1,245,620 in 2021, to \$9,861,681 in 2022, and decreased to -\$3,040,738 in 2023.

RESPONSE: As shown on Schedule II-D-1.1, TWU's total per-book water O&M costs increased from \$22.8 million in 2021 to \$24.2 million in 2022 to \$28.3 million in 2023. Generally, year-over-year increases in O&M costs are due to utility growth and inflationary pressure. TWU's water connection count increased from 32,358 as of December 31, 2021, to 35,181 as of December 31, 2023, an increase of over 8.7%. The national inflation rate between 2021 and 2023 was 12.45%. As stated in the direct testimony of Jeffrey L. McIntyre, "The compound annual growth rate of TWU's O&M expenses from its last rate case (test year ending December 31, 2019) to this rate case (test year ending December 31, 2023) is 1.65%, which compares favorably to average annual inflation during that time of 4.53%."<sup>14</sup> Though the overall O&M costs increase year over year, specific individual accounts may aberrate from this general trend. The primary reason for this aberration in the miscellaneous expense account is because some O&M expenses were booked to NARUC account 675 – Miscellaneous Expenses in 2022 that were booked to different individual NARUC accounts in other years. This is evidenced by the aberration in the opposite direction of NARUC account 675 -Miscellaneous Expenses. In other words, certain costs were booked to the other accounts in 2021 and 2023, but similar costs were booked to miscellaneous expenses in 2022, thereby causing the 2022 NARUC account 675 -Miscellaneous Expenses to appear overstated relative to other years and the other accounts to appear understated relative to other years.

<sup>13</sup> https://www.calculator.net/inflation-calculator.html?cstartingamount1=100&cinmonth1=13&cinyear1=2021&coutmonth1=13&coutyear1=2023&calctype=1&x=Calculate#uscpi

<sup>&</sup>lt;sup>14</sup> Direct Testimony of Jeffrey L. McIntvre at 10:6–9.

## TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

STAFF 2-15 Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the wastewater transportation expenses decreased from \$113,834 in 2021, to \$106,436 in 2022, and decreased to \$0 in 2023.

RESPONSE: As stated in response to Staff RFI 2-11, approximately \$156,000 of costs were

inadvertently booked to water transportation expense instead of wastewater

transportation expense.

Prepared by: Alhaj Chaudhry Sponsored by: Alhaj Chaudhry

### TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-16** Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the wastewater miscellaneous expenses increased from -\$61,041 in 2021, to \$2,060,280 in 2022, and increased to \$2,413,917 in 2023.

RESPONSE: As shown on Schedule II-D-1.1, TWU's total per-book wastewater O&M costs increased from \$3.6 million in 2021 to \$4.2 million in 2022 to \$3.7 million in 2023. Generally, year-over-year increases in O&M costs are due to utility growth and inflationary pressure. The national inflation rate between 2021 and 2023 was As stated in the direct testimony of Jeffrey L. McIntyre, "The compound annual growth rate of TWU's O&M expenses from its last rate case (test year ending December 31, 2019) to this rate case (test year ending December 31, 2023) is 1.65%, which compares favorably to average annual inflation during that time of 4.53%." Though the overall O&M costs increase from 2021 to 2023, specific individual accounts may aberrate from this general trend. The primary reason for this aberration in the wastewater miscellaneous expense account is because some O&M expenses were booked to NARUC account 775 -Miscellaneous Expenses in 2022 and 2023 that had previously been booked in 2021 to other accounts (such as NARUC account 701 - Salaries & Wages). In other words, certain costs were booked to the other accounts in 2021, but similar costs were booked to miscellaneous expenses in 2022 and 2023, thereby causing the 2022 and 2023 NARUC account 775 – Miscellaneous Expenses to appear overstated relative to 2021 and the other accounts to appear understated relative to other years.

## TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

STAFF 2-17 Please provide a copy of the bill of materials and labor costs that support the utility's tap fee.

**RESPONSE**: TWU is requesting approval of three distinct water tap fees and four distinct wastewater tap fees. Two of the proposed water tap fees are fixed fees based on average costs, and the other water tap fee is based on the actual cost of installing each tap. Three of the proposed wastewater tap fees are fixed fees based on average costs, and the other wastewater tap fee is based on the actual cost of installing each tap. Typical bills of materials for each tap fee based on average costs are provided below (unit costs shown are current 2024 TWU inventory prices). For each specific tap, additional parts or materials drawn from inventory or purchased from a supplier may be required due to line size or existing customer side conditions.

#### Water

## TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-19** Please state if tap installations will be done by the utility's internal employees or by a contractor.

**RESPONSE**: TWU is requesting approval of seven distinct tap fees. Please refer to the response to Staff RFI 2-17 for a summary of typical items included in the tap process and their average costs. For all taps the installation is given a final inspection by TWU staff.

- 1. <u>Tap Fee (Residential Pre-Installed Service Line) Water:</u> All work and materials are pre-installed, usually as part of the complete distribution system, by outside contractors. The meter and miscellaneous fittings are done by TWU employees.
- 2. <u>Tap Fee (Residential) Water</u>: In general, materials are supplied internally by the company from inventory and installation is then done by outside contractors. Occasionally, except for the meter, the contractors may also include some or all materials as part of the work.
- 3. <u>Tap Fee (Non-residential, Large, or Nonstandard Service) Water:</u> For non-standard service taps the scope of work and source of materials will be set prior to installation. Typically, most of the work will be done by outside contractors.
- 4. <u>Tap Fee (Residential Pre-Installed Service Line) Sewer</u>: All work and materials are pre-installed as part of the collection system by outside contractors. Typically, the connection to the customer side lateral is also done by outside entities and inspected by TWU.
- 5. <u>Tap Fee (Residential Gravity Sewer)</u>: In general, materials are supplied internally by TWU from inventory and installation is done by outside contractors. Occasionally, the contractors will provide parts and materials as part of the work.
- 6. <u>Tap Fee (Residential On-site Pressure Sewer)</u>: Materials are supplied internally by the company from inventory and installation is done by outside contractors. Occasionally, the contractors will provide parts and materials as part of the work.
- 7. <u>Tap Fee (Large Volume and Non-Standard Service) Sewer:</u> For non-standard service taps the scope of work and source of materials will be set prior to installation. Typically, work will be done by outside contractors.

# TWU'S RESPONSE TO COMMISSION STAFF'S FIFTH RFI

- **STAFF 5-12** Please identify any entities or individuals who provided contract labor or services to TWU during the test year, and provide the following:
  - (a) Name of the entity or individual;
  - (b) A detailed written description of the type of services contracted for, or the job functions performed by any individual;
  - (c) Amount of contract;
  - (d) The total amount paid to each entity or individual identified; and
  - (e) A detailed expense report for each total payment identified in item (d).

**RESPONSE**: Please refer to Attachment Staff 5-12 for responses to (a), (b) and (d). Subparts (c) and (e) can be provided on a sample selection basis.

# TWU'S RESPONSE TO COMMISSION STAFF'S SECOND RFI

**STAFF 2-11** Refer to Schedule II-D-1.1. Please provide a detailed statement and evidence to support why the water transportation expenses decreased from \$718,364 in 2021, to \$673,470 in 2022, and increased to \$979,245 in 2023.

RESPONSE: As shown on Schedule II-D-1.1, TWU's total per-book water O&M costs increased from \$22.8 million in 2021 to \$24.2 million in 2022 to \$28.3 million in 2023. Generally, year-over-year increases in O&M costs are due to utility growth and inflationary pressure. TWU's water connection count increased from 32,358 as of December 31, 2021, to 35,181 as of December 31, 2023, an increase of over 8.7%. The national inflation rate between 2021 and 2023 was 12.45%. As stated in the direct testimony of Jeffrey L. McIntyre, "The compound annual growth rate of TWU's O&M expenses from its last rate case (test year ending December 31, 2019) to this rate case (test year ending December 31, 2023) is 1.65%, which compares favorably to average annual inflation during that time of 4.53%."10 Though the overall O&M costs increase year over year, specific individual accounts may aberrate from this general trend. The primary reason for this aberration in the transportation expense account is because some O&M expenses were booked to NARUC account 675 - Miscellaneous Expenses in 2022 that were booked to different individual NARUC accounts in other years. This is evidenced by the aberration in the opposite direction of NARUC account 675 – Miscellaneous Expenses. In other words, certain costs were booked to the transportation expense account in 2021 and 2023, but similar costs were booked to miscellaneous expenses in 2022, thereby causing the 2022 NARUC account 675 – Miscellaneous Expenses to appear overstated relative to other years and the transportation expense account to appear understated relative to other years. Additionally, upon review in developing its response to this RFI, TWU identified approximately \$156,000 of transportation expenses in 2023 that were inadvertently included in water transportation expense and should have been booked to wastewater transportation expense. Please see also the response to

# TWU'S RESPONSE TO OPUC'S FIRST RFI

**OPUC 1-14** Were any of the systems included in this application under mandatory watering

restrictions due to drought or other regulations during the test year? If so, please provide a listing of those systems, the customer count, and consumption for each

system during the test year.

RESPONSE: Yes. Please see Attachment OPUC 1-14.

Prepared by: Tim Williford and George Freitag

BILL MESSAGE	

# **Executive Summary**

The Utility approves this User Drought Contingency Plan (UDCP or Plan) to manage its water systems and water resources during drought conditions, periods of abnormally high usage, system contamination, and extended reduction in ability to supply water due to equipment failure or other emergencies in a conscientious, fair, and appropriate manner. This plan is not designed to penalize, stigmatize, or criticize anyone about their respective water use. The sole intent of this plan is to protect the health and safety of the community at large by maintaining an adequate supply of water during the various stages of drought conditions or other water supply emergencies.

The Utility believes significant reductions in water usage can be achieved through voluntary efforts by customer. Implementation of voluntary water conservation measures and conscientious water use practices are encouraged at all times, however, additional water use restrictions are required in cases of extreme drought, periods of abnormally high usage, system contamination, or extended reduction in ability to supply water due to equipment failure.

# Section 1: Declaration of Policy, Purpose, and Intent

The Utility, in their continuing effort to maintain an adequate supply of high quality water, approves this UDCP. In order to maintain supply, storage, and pressure or to comply with regulatory requirements, temporary restrictions may be necessary to limit non-essential water usage. This UDCP has been guided by the Texas Commission on Environmental Quality (TCEQ) Requirements & Rules.

# Section 2: Public Education and Involvement

The Utility will periodically provide customers and wholesale water customers with information about the Plan, including information about the conditions under which each stage of the Plan is to be initiated or terminated and the water use restrictions to be implemented in each stage. The Utility considers drought information timely and promotes easy to understand information related to the UDCP. Therefore, the utility will provide information utilizing one or more of following communication channels:

- Bill inserts
- · Direct mail notices
- Website

On November 1, 2023 an updated version of this User Drought Contingency Plan was posted on the utility's public website swwc.com/texas and public review and comment was solicited from all active customers by an announcement included in the November 2023 monthly bill (Example attached in Appendix). The utility will periodically invite customers by bill message to review the plan and provide input.

# **Section 3: Coordination with Region Water Planning Groups**

The Utility service area is located within Regional Water Planning Groups (RWPG) C, D, G, H, I, J, K and L. The Utility has mailed a copy of this Plan to the respective RWPG.

# Section 4: Coordination with Groundwater Conservation Districts and Regional Surface Water Authorities (Districts)

The Utility owns and operates water systems in several geographical areas within the State of Texas. A number of these areas are subject to District rules, which the Utility is obligated to follow. The Utility is committed to making the best use of groundwater and surface water resources and coordinating conservation efforts with Districts to make the best use of these resources.

# **Section 5: Notice Requirements**

The Utility will provide written notice to each service address by mail, hand delivery or electronic mail prior to implementation or termination of each stage of the water restriction program. The utility will send said notice to each customer at least 72 hours prior to the start of new or modified water use restrictions. If the Utility hand delivers said notice, the Utility will not enforce the provisions of the plan for 24 hours after notice is provided.

The Utility will provide the following information on the written notice:

- · the date restrictions will begin,
- the triggering circumstances,
- an outline of the stages and explanation of restrictions in this plan, and
- an explanation of the violation consequences.

During Stage 3, the Utility will notify customers that violating sprinklers, automatic irrigations systems or use of hand held hose restrictions may result in installation of a flow restrictor without a prior notice.

Prior to implementing Alarm, Critical or Exceptional Drought Stage, the Utility will notify the TCEQ by telephone at (512) 239-4691 or by electronic mail using the Drought Contingency Plan Water Use Restrictions Reporting Form: at <a href="https://www.tceq.texas.gov/drinkingwater/homeland-security/security-pws">https://www.tceq.texas.gov/drinkingwater/homeland-security/security-pws</a>

In addition, the Utility will notify, in writing, the TCEQ District and the Public Drinking Water Section at MC-155, P.O. Box 13087, Austin, TX 78711-3087 and the Public Utility Commission of Texas (PUC) within five (5) working days of implementation.

# Section 6: Enforcement Procedures and Plan Adoption

No person shall knowingly or intentionally allow the use of water from the Utility for residential, commercial, industrial, agricultural, governmental or any other purpose in a manner contrary to any provision of this Plan, or in an amount in excess of that permitted by the drought response stage in effect at the time pursuant to action taken by the Utility Management in accordance with provisions of the Plan.

Any person, including a water customer of the Utility in apparent control of the property where a violation occurs or originates, shall be presumed to be the violator and proof that the violation occurred on the person's property shall constitute a presumption that the person in apparent control of the property committed the violation, but any such person shall have the right to prove a violation was not committed. Parents or guardians are presumed to be the responsible party for violations committed by their minor children. A violation of this policy, committed by a child, occurring on property within the parent or guardian control shall constitute a presumption that the parent committed the violation. The Utility reserves the right to review violations on a case by case basis and discharge violations of this plan where a violator provides reasonable evidence of a good faith effort to prevent a violation of this plan.

To implement and enforce this plan, the Utility will:

utilize methods and procedures outlined in this plan,

- incorporate enforcement measures and surcharges available to CCN holders under TCEQ and PUC rules, and
- will notify system end-users of the authority and intent to enforce the measures of this plan.

Penalties for violations are outlined in the respective plan stages below.

# **Section 7: Exemptions or Variances**

The Utility may grant any customer an exemption or variance from the UDCP for good cause upon written request. If such a request may cause the Utility to violate a provision as set by Districts, the Utility may request a variance to the provision from said District. Any customer refused an exemption or variance by the Utility may appeal such action of the Utility in writing to the TCEQ and/or the PUC. The Utility will treat all customers equally concerning exemptions and variances, and shall not discriminate in granting exemptions and variances. No exemption or variance shall be retroactive or otherwise justify any violation of this Plan occurring prior to the issuance of the variance.

The Utility Management, may, in writing, grant temporary variances for existing water uses otherwise prohibited under this Plan if it is determined that failure to grant such variances would cause an emergency condition adversely affecting health or sanitation for the public or the person requesting such variance and if one or more of the following conditions are met:

- Compliance with this Plan cannot be technically accomplished during the duration of the supply shortage or other condition for which the Plan is in effect.
- Alternative methods can be implemented which will achieve the same level of reduction in water use.

Persons requesting an exemption from the provisions of the Plan shall file a petition for variance with the Utility within five (5) days after the Plan or a particular drought response stage had been invoked. All petitions for variances shall be reviewed by the Management of the Utility and shall include the following:

- Name and address of the petitioner(s).
- Purpose of water use.
- Specific provision(s) of the Plan from which the petitioner is requesting relief.
- Detailed statement as to how the specific provision of the Plan adversely affects the petitioner or what damage or harm will occur to the petitioner or others if petitioner complies with this provision.
- Description of the relief requested.
- Period of time for which the variance is sought.
- Alternative water use restrictions or other measures the petitioner is taking or proposes to take to meet the intent of this Plan and the compliance date.
- Other pertinent information.

Variances granted by the Utility are subject to the following conditions, unless waived or modified by Management:

- Variances granted shall include a timetable for compliance.
- Variances granted shall expire when the Plan is no longer in effect, unless the petitioner has failed to meet specific requirements.

No variance shall be retroactive or otherwise justify any violation of the Plan occurring prior to the issuance of the variance.

# Section 8: Response Stages

Unless there is an immediate and extreme reduction in an aquifer level; water availability or production; critical system capacity; or other absolute necessity to declare an emergency or severe condition, the Utility will progress sequentially from Stage 1 through more restrictive stages. If, after a reasonable period of time, demand is not reduced enough to alleviate the conditions that initiated restrictions or to comply with restrictions required by a court, district, government agency, wholesale provider or other authority, some outdoor water use provisions in a particular Stage may be modified or further restricted or more restrictive Stages implemented as necessary to achieve the necessary reductions. In addition to restricted watering times, maximum monthly or weekly customer usage targets may be implemented and enforced in the same manner as the restrictions listed below. Notice of any modified restrictions or of a more stringent stage will be provided to customers in accordance with Section 3. In order to comply with the requirements of an underground district, wholesale provider or other authority, the Utility may skip a less restrictive stage and immediately implement Stage II, Stage III or Stage IV.

# Section 9: Drought, Demand & Critical System Capacity Stage Triggers

Water System Supply Contamination or Outage

In the event of system supply contamination or system outage, the Utility may immediately implement the response measures of Stage IV.

Demand Based Triggers

Trigger	Stage I (Mandatory)	Stage II (Mandatory)	Stage III (Mandatory)
Percent of water treatment capacity reached for 3 or more days in a week	60	75	90
Well pump hours per day for more than 3 days.	15 Hours	18 hours	22 hours

# Supply Based Triggers

For those systems where the Utility pumps water from a ground water district or purchases water from wholesalers, the district or wholesale supplier will formally notify the Utility of one or more precipitating events triggering a stage of the district or wholesaler's drought contingency plan. Upon enactment of a stage in the district, authority or wholesaler's drought contingency plan, the Utility may correspondingly implement the same or equivalent stage in its service area. The Utility can modify its plan to match the watering schedules, daily watering hours or other specific restrictions of a wholesaler, district or other authority if asked to do so. The Utility will notify customers of any changes in days, hours or other provisions prior to enforcing provisions of the plan. When the Utility must self regulate to comply with ground water permit limitations, water restrictions may be enacted to ensure compliance with permit limits.

# Section 10: Alternative Water Sources

If available an alternate water source will be used directly by the Utility to manage limited water supplies in the event of water supply contamination, system outage or conditional permitting curtailments.

# **Section 11: Wholesale Water Customers**

This section is applicable to wholesale water customers of the Utility who are public water suppliers.

# Public Involvement

Opportunity for the wholesale water customers to provide input into the preparation of the Plan was provided by Texas Water Utilities, L.P. and SWWC Utilities, Inc. by means of first class mail.

Pro Rata Water Allocation

In the event that the triggering criteria specified in Section 12 of the Plan for Stage IV – Exceptional Drought, the Director of Operations is hereby authorized to initiate allocation of water supplies on a pro rata basis in accordance with Texas Water Code, §11.039.

### **Contract Provisions**

The Utility will include a provision in every wholesale water contract entered into or renewed after adoption of the plan, including contract extensions, that in case of a shortage of water resulting from drought, the water to be distributed shall be divided in accordance with Texas Water Code, §11.039.

## Section 12: Water Conservation Periods and Drought Stage Responses

Drought contingency plans are multifaceted. To aid the general public and utility employees in understanding this plan, the Utility provides a summary of the mandatory Stages I, II, and III in Section 13.

# Awareness (Voluntary, No Restrictions)

# Goal

Reduce water consumption and usage by ten (10) percent through voluntary conservation.

# Triggers/ Rationale for Initiation

To preserve the health, safety, and well-being of water users, the Utility encourages customers to follow voluntarily conservation awareness practices below. When not in a declared drought or mandatory water restriction period, the Utility will implement this voluntary conservation stage between May 1st and September 30th. The Utility will notify customers each spring that Voluntary Conservation is in place.

# Voluntary Practices

The Utility recommends customers voluntarily limit the irrigation of landscaped areas using hose-end sprinklers or automatic systems between 12:01 AM to 4:00 AM; 7:00 AM to 10:00 AM; and 8:00 PM to 11:59 PM on the designated watering day on the approved watering schedule cited in Section 12.

# Additional Conservation Practices

- Water garden, trees, flowers or other landscaped areas with hand held hose, a faucet filled bucket or watering can any day between 6:00 PM to 10:00 AM, and avoid unattended hoses.
- Utilize soaker hoses anywhere except lawns from 8:00 PM to 10:00 AM
- Limit vehicle washing with bucket or hand-held hose with automatic shut-off.
- Draw less water for bath or reduce shower time.
- Do not let water run while shaving, dish washing, brushing teeth, etc.
- Keep pools covered if not used on a daily basis.
- Use water displacement device in toilet tank.
- Install aerators on faucets.
- Utilize water reuse where possible.
- Replacement or retrofits with ultra low flow fixtures is encouraged.
- Use a broom or blower instead of a hose to wash off driveways, sidewalks, or streets.
- Use Commercial Car Washes that recycle water.
- Take measures to prevent runoff from property from reaching streets, sidewalks, or impervious areas.

# Utility Measures

To ensure the Utility maximizes water conservation efforts, it will manage limited water supplies and/or reduce water demand by reducing or discontinuing public landscape irrigation and by using alternative supply source(s). The Utility will provide its respective employees copies of this plan. Utility management will be available to answer any employee or staff questions.

The Utility will work closely with Districts and provide timely information on water levels, water quality and pumping demands. The Utility will conduct leak surveys as required and repair all water leaks in a timely fashion. The Utility will request water users to report leaks to the Utility.

# Triggers/ Rationale for Termination of this Stage

The Voluntary Conservation Stage is in effect between May 1st and September 30th. The Utility will notify customers each fall that although the Voluntary Conservation Stage is not in place they are still encouraged to practice wise water use habits.

# Stage I: Mandatory (Mandatory Restrictions)

### Goal

Reduce water consumption and usage by ten (10) percent through mandatory restrictions.

# Triggers/ Rationale for Initiation

If the system meets supply or demand triggers identified in Section 9 of this plan or critical system capacities are threatened, the Utility will activate Stage I.

## Mandatory Restrictions

The Utility supports continued water conservation practices and voluntary reductions in water use in general. In addition, the Utility enforces the following mandatory restrictions on outdoor water use:

- Use of Automatic irrigation systems and hose end sprinkler(s) is limited between 12:01 AM to 4:00 AM;
   7:00 AM to 10:00 AM; and 8:00 PM to 11:59 PM on the approved Watering Day Schedule cited in Section 12. Twice weekly watering allowed.
- Irrigation of landscaped areas, such as gardens, trees and flowers by hand-held hose, a faucet-filled bucket or watering can of five (5) gallons or less, or drip irrigation system is allowed any day between 12:01AM to 10:00 AM and 7:00 PM to 11:59 PM. The Utility prohibits leaving hand-held hoses unattended unless the hose is connected to an automatic shut-off nozzle.
- Use of soaker hoses on landscaped areas is allowed from 12:01 AM to 10:00 AM and 8:00 PM to 11:59 PM on the approved Watering Day Schedule cited in Section 12.
- Washing any motor vehicle, motorbike, boat, trailer, airplane or other vehicle with a bucket or hand-held hose with automatic shut off nozzle is permitted one (1) time every two weeks. Vehicle washing is permitted be done at any time on the immediate premises of a commercial car wash or commercial service station. Further, such washing may be exempted from these regulations if the health, safety and welfare of the public are contingent upon frequent vehicle cleansing, such as garbage trucks and vehicles used to transport food and perishables.
- Topping off pools is allowed on the approved Watering Day Schedule cited in Section 12. However, outdoor water use, such as filling, refilling or adding of water to swimming pools, wading pools and Jacuzzi-type pools; and operation of any ornamental fountain or pond for aesthetic or scenic purposes except where necessary to support aquatic life or where such fountains or ponds are equipped with a re-circulation system is prohibited.
- Washing or rinsing driveways, sidewalks, or streets is prohibited at all times.
- The use of water for construction purposes from designated fire hydrants is permitted under special permit.
- No water runoff from property is allowed.

### Violations & Penalties

### First Violation

The Utility will issue a written Notice of Violation to the customer.

#### Second Violation

The Utility may install a flow restriction device in the line to limit the amount of water which will pass through the meter in a 24 hour period. The Utility may charge the customer for the cost of installing and removing the flow restricting device. This cost shall not exceed \$50.00 dollars.

## **Third Violation**

The Utility may discontinue service at the meter for a period of seven (7) days, or until the end of the calendar month, whichever is LESS. The normal reconnect fee of the Utility will apply for restoration of service.

# **Utility Measures**

During Stage I, the Utility requests that customers voluntarily limit the use of water for non-essential purposes by practicing water conservation and promoting efficient use of water.

To ensure the Utility maximizes water conservation efforts, it will manage limited water supplies and/or reduce water demand by reducing or discontinuing water main flushing, public landscape irrigation; and by using alternative supply source(s). The Utility will provide its respective employees copies of this plan. Utility management will be available to answer any employee or staff questions.

The Utility will work closely with Districts and provide timely information on water levels, water quality and pumping demands. The Utility will conduct leak surveys as required and repair all water leaks in a timely fashion. The Utility will request water users to report leaks to the Utility.

# Triggers/ Rationale for Termination of this Stage

Stage I of the Plan may be rescinded when all of the conditions listed as triggering events have ceased to exist for a period of seven consecutive days. Upon termination of Stage I, the Awareness (Voluntary) stage, or the applicable drought response stage based on the triggering criteria, becomes operative. Customers will be notified following the procedures outlined in Section 5.

# Stage II: Alarm (Mandatory Restrictions)

#### Goal

Reduce water consumption and usage by twenty (20) percent through mandatory restrictions.

# Triggers/ Rationale for Initiation

If the system meets supply or demand triggers identified in Section 9 of this plan or critical system capacities are threatened, the Utility will activate Stage II.

### Mandatory Restrictions

The Utility supports continued water conservation practices and voluntary reductions in water use in general. In addition, the Utility enforces the following mandatory restrictions on outdoor water use:

- Use of automatic irrigation systems is limited between 12:01 AM to 4:00 AM and 8:00 PM to 11:00 PM on the approved Watering Day Schedule cited in Section 12. Once weekly watering allowed.
- Use of a hose end sprinkler(s) is limited between 12:01 AM to 4:00 AM and 7:00 PM to 11:59 PM on the approved Watering Day Schedule cited in Section 12.
- Irrigation of landscaped areas, such as gardens, trees and flowers by hand-held hose, is limited between 12:01 AM to 4:00 AM and 7:00 PM to 11:59 PM on the approved Watering Day Schedule cited in Section 12.
- Soaker Hoses for all landscaped areas, except lawns, is permitted from 12:01 AM to 10:00 AM and 8:00 PM to 11:59 PM on the approved Watering Day Schedule cited in Section 12.
- Washing any motor vehicle, motorbike, boat, trailer, airplane or other vehicle with a bucket or handheld hose with automatic shut-off nozzle is prohibited. Vehicle washing is permitted at any time on the immediate premises of a commercial car wash or commercial service station that uses recycled water. Further, such washing may be exempted from these regulations if the health, safety and welfare of the public are contingent upon frequent vehicle cleansing, such as garbage trucks and vehicles used to transport food and perishables.
