BEFORE THE PUBLIC UTILITY COMMISSION OF TEXAS

RESPONSE OF ONCOR ELECTRIC DELIVERY COMPANY LLC TO STEERING COMMITTEE OF CITIES SERVED BY ONCOR'S FIRST REQUEST FOR INFORMATION

TO THE HONORABLE PUBLIC UTILITY COMMISSION OF TEXAS:

Oncor Electric Delivery Company LLC ("Oncor") files this Response to the aforementioned requests for information.

l. <u>Written Responses</u>

Attached hereto and incorporated herein by reference are Oncor's written responses to the aforementioned requests for information. Each such response is set forth on or attached to a separate page upon which the request has been restated. Such responses are also made without waiver of Oncor's right to contest the admissibility of any such matters upon hearing. Oncor hereby stipulates that its responses may be treated by all parties exactly as if they were filed under oath.

II. Inspections

In those instances where materials are to be made available for inspection by request or in lieu of a written response, the attached response will so state. For those materials that a response indicates are voluminous, materials will be provided in electronic format through an Oncor FTP file sharing site upon request. Requests for voluminous materials should be directed to Regulatory@oncor.com. To review materials that a response indicates may be inspected at their usual repository, please call Joni Price at 214-486-2844. Inspections will be scheduled so as to accommodate all such requests

with as little inconvenience to the requesting party and to company operations as possible.

Respectfully submitted,

ONCOR ELECTRIC DELIVERY COMPANY LLC

CERTIFICATE OF SERVICE

It is hereby certified that a copy of the foregoing has been served by email on all parties of record who have provided an email address, on this the 9th day of September, 2024, in accordance with the Commission's Second Order Suspending Rules issued on July 16, 2020, in Project No. 50664.

/s/ Stephanie Tenorio

Request

Refer to the Direct Testimony of Coler D. Snelleman at 3.

- a. Please provide the actual number of meters in reserve at each service center and central warehouse by month beginning January 2022.
- b. Please provide the number of meters purchased by month beginning January 2022
- c. Please provide the number of meters installed by month beginning January 2022.
- d. Please provide the average time a meter is in inventory before it is installed on the system.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman, the sponsoring witness for this response.

For a., b., and c., see Table 1 below, which identifies, by month, the total number of meters in reserve among all service centers and the central warehouse, the total meters installed, and the total meters purchased.

d. The average time a meter is in inventory before it is installed is 123 days. The inventory average age is based on the average number of days a meter is in reserve status from the purchase date to the installation date.

Request

Refer to the Direct Testimony of Coler D. Snelleman at 8.

- a. Please provide the actual number of distribution transformers in reserve at each service center and central warehouse by month beginning January 2022.
- b. Please provide the number of distribution transformers purchased by month beginning January 2022.
- c. Please provide the number of distribution transformers installed by month beginning January 2022.
- d. Please provide the average time a distribution transformer is in inventory before it is installed on the system.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman, the sponsoring witness for this response.

For a., b., and c., see Table 1 below, which identifies, by month, the total number of distribution transformers in reserve among all service centers and the central warehouse, the total distribution transformers installed, and the total distribution transformers purchased.

d. The average time a distribution transformer is in inventory before it is installed is 56 days. The inventory average age is based on the average number of days a transformer is in reserve status from the purchase date to the installation date.

Oncor - Docket No. 56963 OCSC RFI Set No. 1 Question No. 1-04 Page 1 of 1

Request

Refer to WP B-1 _I _2022. Please explain the purpose of Project 3472685E, 2018 CAPEX CARRYOVER: DENDR000, costing \$1,382,963.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman and W. Alan Ledbetter, the sponsoring witnesses for this response.

Project 3472685E, 2018 CAPEX CARRYOVER: DENDR000 is another phase of a larger planned underground facility upgrade program that involved the replacement of 750 Paper Insulated Lead Cable ("PILC") with 500 Ethylene Propylene Rubber Cable on the DENDR0001 feeder at Dallas Love Field Airport. PILC is an older style of cable that is no longer typically used outside of maintenance activity, as it has demonstrated some reliability issues at other locations.

Oncor - Docket No. 56963 OCSC RFI Set No. 1 Question No. 1-05 Page 1 of 1

Request

Refer to WP B-1_1_2022. Please explain if Project IT160009, Work and Asset Management, costing \$84,315,918, is assigned 100% to Distribution or is any of the project allocated to Transmission.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman and W. Alan Ledbetter, the sponsoring witnesses for this response.

The Work and Asset Management Project is entirely assigned to the distribution function. Please see Attachments 1 and 2 for information responsive to this request.

ATTACHMENTS:

ATTACHMENT 1 – Oncor's response to OCSC RFI Set No. 1, Question No. 1-09, in Docket No. 55190, 1 page.

ATTACHMENT 2 – Oncor's response to CITIES RFI Set No. 1, Question No. 1-05, in Docket No. 56306, 2 pages.

Oncor - Docket No. 55190 OCSC RFI Set No. 1 Question No. 1-09 Page 1 of 1

Request

Refer to the Direct Testimony of Coler D. Snelleman at 25-26:

- a. Please explain whether the Distribution Asset and Work Management project (WaAM) will be used entirely for the distribution function or is the project also allocated to transmission or other functions. If the project is only allocated to distribution, please explain if transmission has its own work management information system.
- Please state the project numbers(s) reflecting the WaAM project and the FERC account(s) to which Oncor booked its WaAM project.
- c. Please state the depreciation rate(s) that Oncor applied to the WaAM project and the basis for using those rates.
- d. Please identify the project number(s) that reflect the retirement of the work management information system that the WaAM project is replacing.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman and W. Alan Ledbetter, the sponsoring witnesses for this response.

- a. The distribution Work and Asset Management ("WaAM") investment is used to support only the distribution function. The transmission function has its own directly assigned investments in work and asset management systems.
- b. IT160009 Work and Asset Management is the project for the WaAM investment, and it is booked to FERC Plant Account 303 Miscellaneous Intangible Plant.
- c. The depreciation rate for the WaAM investment is 6.46%. The WaAM investment was assigned an intangible plant life of 15 years, based on the anticipated life of the functionality provided by the investment.
- d. WaAM replaced the work and asset management components of the 1998 Distribution Information System ("DIS") which was included in Oncor's contributed computer software applications in order for Capgemini (a third-party service provider) to provide services to Oncor. As the DIS investment was previously removed from plant coincident with the Capgemini outsourcing, there were no retirement projects to recognize when WaAM was placed in service in 2022.

Oncor - Docket No. 56306 CITIES RFI Set No. 1 Question No. 1-05 Page 1 of 2

Request

Refer to Direct Testimony of Coler D. Snelleman at 26.

- a. Please explain what "WaAM" stands for and explain if the Hypercare project was developed internally with Oncor resources or was outsourced. If outsourced, please identify the vendor.
- b. Please provide the WaAM investment separately for 2022 and 2023 identify where the costs are reflected in the DCRF schedules.
- c. Please explain if WaAM is used by both distribution and transmission? If so, how are the project costs allocated between distribution and transmission. If not, please explain why none of the functionality of the project is usable by transmission.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman, the sponsoring witness for this response.

- a. "WaAM" stands for Work and Asset Management. The WaAM Hypercare project was developed and managed by Oncor. During the development process, Oncor supplemented its internal resources with certain third-party resources and consultants to aid in Oncor's development of this collection of functionality across multiple applications.
- b. The WaAM investment for 2022 for Project JT160009 "Work and Asset Management" is \$84.3M. Reference discussion of this investment in the Direct Testimony of Coler D. Snelleman at 25 through 27 in Docket No. 55190 (Oncor's application to amend its DCRF to include distribution invested capital placed in service during 2022). The WaAM investment for 2023 includes additional costs for Project JT160009 of \$0.2M and costs for Project ITWA2204 ("WaAM Hypercare") of \$18.7M. Reference discussion of the WaAM Hypercare project in the Direct Testimony of Coler D. Snelleman beginning at 26 in this DCRF application.

Intangible plant account 303 investment for WaAM and WaAM Hypercare is reflected on DCRF Schedule B-1, Line 1d (intangible plant account 303 with a 15-year life) in the Additions Column (2) and Balance at 12/31/2023 Column (4). Reference Bates page 160 in this DCRF application. DCRF Schedule E-1, Line 1d includes the additional depreciation (amortization) expense on the WaAM plant investment additions at 12/31/2023. Reference Bates page 164 in this DCRF application.

Project IT160009 Work and Asset Management is shown on Bates page 331 (page 113 of WP/Schedule B-1/1/2022) and Bates page 336 or page 2 of WP/Schedule B-1/1/6 ME 06302023 in this DCRF application.

Oncor - Docket No. 56306 CITIES RFI Set No. 1 Question No. 1-05 Page 2 of 2

Project ITWA2204 WaAM Hypercare is shown on Bates page 461 or page 62 of WP/Schedule B-1/1/6 ME 12312023 in this DCRF application.

c. The distribution "WaAM" investment is used to support only the distribution function. The transmission function has its own directly assigned investments in work and asset management systems.

Oncor - Docket No. 56963 OCSC RFI Set No. 1 Question No. 1-06 Page 1 of 1

Request

Refer to WPs Schedule B-1_1_2 Substation over \$100k by Property Unit 2022, 6 ME 6-30-23, 6 ME 12.31.23, and 6 ME 6-30-24. Please confirm that for all substation land purchases included in Oncor's requested DCRF, construction has either already commenced or will commence within 24 months from the land purchase date. If Oncor cannot confirm, please provide an explanation why not.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman and W. Alan Ledbetter, the sponsoring witnesses for this response.

Oncor can neither confirm nor deny. Oncor has identified 45 substation land tract purchases over \$100K that have occurred during the 30-month Distribution Cost Recovery Factor ("DCRF") update period ending June 30, 2024. Of these 45 land tract purchases, substation construction activity is not expected within a 24-month period for five of the projects and the investment has been transferred from electric plant in service to electric plant held for future use (Federal Energy Regulatory Commission Uniform System of Accounts number 105). Accordingly, the land investment associated with these five substation construction projects is not included in Oncor's DCRF application.

Of the remaining 40 identified substation land tract purchases over \$100K that are included in Oncor's DCRF update, 20 of the associated substation construction projects have already commenced and/or been completed. In each of these 20 projects, Oncor can confirm that the construction start date was within 24 months of the associated land purchase date.

As to the remaining 20 identified substation land tract purchases over \$100k included in Oncor's DCRF update, six substation construction projects have established construction commencement date estimates, and each of the established, estimated construction start date for these six projects is within 24 months from the associated land purchase date. For the remaining 14 substation land tract purchases, Oncor currently expects that construction will commence within 24 months from the land purchase date, but a construction schedule has not yet been established for the substations associated with those land purchases.

Thus, Oncor cannot confirm with certainty that construction will commence within 24 months from the land purchase date for any of the land purchases described above other than the 20 for which construction has already commenced and/or concluded. As explained on pages 17-18 (Bates pages 143-144) of Mr. Snelleman's direct testimony, construction typically begins up to 24 months after the substation land purchase, but construction schedules may occasionally change due to various factors and result in reasonable delays in the commencement of construction.

Oncor - Docket No. 56963 OCSC RFI Set No. 1 Question No. 1-07 Page 1 of 1

Request

Refer to WP Schedule B-1_1_3 Distribution over \$100k by Property Unit 2022. Please provide an explanation why this workpaper includes projects that have in-service dates in 2020 and 2021 and confirm whether these projects are not already included in rates.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman and W. Alan Ledbetter, the sponsoring witnesses for this response.

Please see Attachment 1 for information responsive to this request.

The costs listed in workpaper WP/Schedule B-1/1/3/2022 reflect only the incremental costs incurred during the 12 months ending December 31, 2022, that were not already included in distribution rates as of the filing date of Oncor's Distribution Cost Recovery Factor ("DCRF") update application in Docket No. 55190 (in other words, it reflects only the distribution and distribution-related costs not reflected in the DCRF baseline as of December 31, 2021, as established in Docket No. 54817.) Coincident with the September 1, 2023 implementation date of interim DCRF rates from Docket No. 55190, the distribution and distribution-related costs reflected in workpaper WP/Schedule B-1/1/3/2022 are currently in rates.

ATTACHMENT:

ATTACHMENT 1 – Oncor's response to OCSC RFI Set No. 1, Question No. 1-10, in Docket No. 55525, 1 page.

Response

The following response was prepared by or under the direct supervision of W. Alan Ledbetter and Coler D. Snelleman, the sponsoring witnesses for this response.

Distribution plant addition projects with in-service dates of 2021 or earlier are included in this DCRF update proceeding because additional trailing construction activities and/or costs were recorded during the interim DCRF update period reflecting the 18-month period ending June 30, 2023. Only the incremental costs (i.e., post-December 31, 2021) are reflected in the requested DCRF revenue requirement increase.

In general, there are three scenarios that may produce this minor variation in accounting recognition timing, which typically occurs near the end of an accounting period (e.g., late November or December). With respect to the projects listed in this RFI response, the most common circumstance involves trailing contractor invoicing or other charges received subsequent to the in-service date. Second, the in-service date and/or final as-built reporting activity is received following the various cut-off periods reflected in the DCRF update periods. Less frequently, but still a source of timing variation, the cost estimates available at the time a project is placed into service may be based on accounting accruals. In this latter case, the project will not unitize until actual costing information is available.

Oncor - Docket No. 56963 OCSC RFI Set No. 1 Question No. 1-08 Page 1 of 1

Request

Refer to WP Schedule B-1_1_3 Distribution over \$100k by Property Unit 6 ME 6-30-23. Please provide an explanation why this workpaper includes projects that have in-service dates in 2021 and 2022 and confirm whether these projects are not already included in rates.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman and W. Alan Ledbetter, the sponsoring witnesses for this response.

Please see Oncor's response to OCSC RFI Set No. 1, Question No.1-07 filed in this docket for an explanation as to why workpaper <u>WP/Schedule B-1/1/3/6 ME 06302023</u> includes costs for projects that have in-service dates of 2021 and 2022.

The costs listed in workpaper WP/Schedule B-1/1/3/6 ME 06302023 reflect only the incremental costs incurred during the six months ending June 30, 2023, that were not already included in distribution rates as of the filing date of Oncor's Distribution Cost Recovery Factor ("DCRF") update application in Docket No. 55525. Coincident with the December 28, 2023 implementation date of updated DCRF rates from Docket No. 55525, the distribution and distribution-related costs reflected in workpaper WP/Schedule B-1/1/3/6 ME 06302023 are currently in rates.

Request

Refer to WP Schedule B-1_1_3 Distribution over \$100k by Property Unit 6 ME 12-31-23. Please provide an explanation why this workpaper includes projects that have in-service dates in 2022 and confirm whether these projects are not already included in rates.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman and W. Alan Ledbetter, the sponsoring witnesses for this response.

Please see Oncor's response to OCSC RFI Set No. 1, Question No.1-07 filed in this docket for an explanation as to why workpaper <u>WP/Schedule B-1/1/3/6 ME 12312023</u> includes costs for projects that have in service dates of 2022.

The costs listed in workpaper <u>WP/Schedule B-1/1/3/6 ME 12312023</u> reflect only the incremental costs incurred during the six months ending December 31, 2023, that were not already included in distribution rates as of the filing date of Oncor's Distribution Cost Recovery Factor ("DCRF") update application in Docket No. 56306. Coincident with the July 1, 2024 implementation date of updated DCRF rates from Docket No. 56306, the distribution and distribution-related costs reflected in workpaper <u>WP/Schedule B-1/1/3/6 ME 12312023</u> are currently in rates.

Oncor - Docket No. 56963 OCSC RFI Set No. 1 Question No. 1-10 Page 1 of 1

Request

Refer to WP Schedule B-1_1_3 Distribution over \$100k by Property Unit 6 ME 6-30-24. Please provide an explanation why this workpaper includes projects that have in-service dates in 2022 and 2023 and confirm whether these projects are not already included in rates.

Response

The following response was prepared by or under the direct supervision of Coler D. Snelleman and W. Alan Ledbetter, the sponsoring witnesses for this response.

Please see Oncor's response to OCSC RFI Set No. 1, Question No.1-07 filed in this docket for an explanation as to why workpaper <u>WP/Schedule B-1/1/3/6 ME 06302024</u> includes costs for projects that have in service dates of 2022 and 2023.

The costs listed in workpaper WP/Schedule B-1/1/3/6 ME 06302024 reflect only the incremental distribution and distribution-related costs incurred during the six months ending June 30, 2024, that are not already included in existing distribution or distribution cost recovery factor rates.
