Control Number - 57115

Item Number - 124

11/4/2024

To: Public Utility Commission of Texas

This is a formal request to choose an alternate route for the proposed Howard Road to San Miguel 345 kV Transmission Line Project. I have lived here and owned this property for 23 years. I have driven 25 to 40 miles for work every weekday of those 23 years because of the peace and beauty of my property. Not only would this transmission line have a devastating impact on my property value, but it would destroy the beauty I look out to from my property. This transmission line will destroy the peace and serenity of my home. I am certain that some other routes can take less usable land instead of destroying something I have worked so hard for, a place I have called home for so long. I have raised my kids here and I still have a 14 and 17 year old at home.

I will also be impacted by my place of seasonal work being shut down. Rockberry Ranch, my seasonal workplace, was created because of the beauty of this area; and cannot maintain that business if the transmission line takes the proposed route. My daughter and my husband also work here and my son hopes to work at Rockberry next spring. This will have a huge impact on our means of supporting our family. The noise of this line will also be very disturbing and disruptive to our family. It will likely disturb my sleep as well as many other essential factors that will deteriorate my well-being. There are many studies that show the negative effects of these lines. I already have disabilities and cannot bear to be further burdened. Please, I implore you to choose an alternative route for this transmission line that does not affect our home.

Please do not destroy our family's way of life.

Best Regards,

Melissa Broussard, SHRM-SCP
