Item Number - 174

October 2024

Docket No. 57115

Statement of Position

Regarding Proposed Howard Rd – San Miguel Transmission Line

The proposed route transversing segments 12 & 24 runs directly fronting our homestead.

It bisects our only stock tank.

It interferes with ongoing professional archaeological investigations regarding the largest pitched land battle in Texas history, the Battle of Encinal de Medina August 1813. Artifacts providing solid evidence were found in October 2023 in this precise proposed transverse area.

Also, major electric transmission lines would disrupt our ranch operation, depreciate land value, and prohibit any future development.
