Austin, Texas 78711-3326

RE: Filing Number 57308

To Whom It May Concern:

Pursuant to 16 TAC §25.511, this letter serves as the required statement to the Public Utility Commission of Texas indicating that an application for a completion bonus grant award has been presented to the Commission for review on April 14, 2025 as application number APP-00000351.

We appreciate the opportunity to add new dispatchable generation to the ERCOT market enabled by the Texas Energy Fund In-ERCOT Loan Program (APP-00000201) and we appreciate the additional opportunity to apply for the Completion Bonus Grant Program. We look forward to closing on our loan funding and building this plant well within the required timeframe. In light of the ever-increasing need for additional generation in the ERCOT region, this plant will improve power grid reliability and provide a stable source of power for our customers.

Thank you for your attention to this important matter.

Sincerely,

Mike Wittler, P.E.
General Manager and CEO
