1. Historical five-year reporting period: 2020 - 2024

What percentage of overhead transmission facilities greater than 60 kilovolts did you inspect for compliance with the National Electric Safety Code (NESC) relating to vertical clearance in the historical five-year reporting period?

Lea County Electric Cooperative, Inc.(LCEC) has inspected 100% of our overhead transmission facilities that are greater than 60 kilovolts. All in compliance with the NESC relating to vertical clearance over the past five-year period.

LCEC achieves this through contracted pole line inspections, along with LCEC's routine inspection and maintenance programs. The target is a minimum of 20% of inspections being performed each year.

2. Future five-year reporting period: 2025 - 2029

What percentage of overhead transmission facilities greater than 60 kilovolts do you anticipate you will inspect for compliance with the NESC relating to vertical clearance during the future five-year reporting period beginning on January 1 of the year in which this report is submitted?

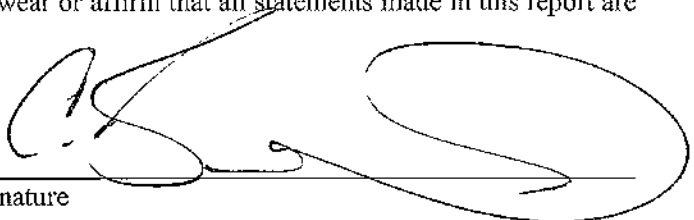

LCEC will achieve this through contracted pole line inspections, along with LCEC's routine inspection and maintenance programs.
