DATE: April 24, 2025

RE: Project No. 57906 - *Application of AETS Old Michigan Solar LLC for a Power Generation Company Registration*

RECOMMENDATION

I. Application

On April 1, 2025, AETS Old Michigan Solar LLC (AETS Old or the Company) filed an application to register as a new power generation (PGC) company pursuant to 16 Texas Administrative Code (TAC) § 25.109. The facility being registered is a solar facility.

II. Application Requirements

Under 16 TAC § 25.109(c) to register as a PGC a person must use the registration form prescribed by the Commission. A person registering as a PGC must provide the following information:

- (1) Contact information of the registrant and the registrant's primary and secondary emergency contacts.
- (2) The name of the current regulatory contact, the contact's e-mail address and telephone number, and if the regulatory contact is an internal staff member of the registrant.
- (3) Information about each generating facility operated by the registrant.
- (4) A description of the types of services provided by the registrant that relate to the generation of electricity.
- (5) An oath or affirmation signed by a representative, official, officer or other authorized person was included with the application.

Furthermore, under 16 TAC § 25.109(d), a person registering as a PGC must also submit the following:

- (1) An affidavit by a representative, official, officer, or other authorized person.
- (2) The name of the registrant's corporate parent company.
- (3) The names of the registrant's affiliates.
- (4) The applicable control number and item number of its initial Emergency Operations Plan (EOP).
- (5) As applicable, copies of the registrant's Federal Energy Regulatory Commission registration as a QF or an EWG.

III. Recommendation

I have reviewed AETS Old Michigan Solar LLC's application to register as a PGC and find it to be insufficient. Although the company provided some of the information required under 16 TAC §§ 25.109(c) and 25.109(d), some of the answers are incomplete. Specifically, its response to Part B question number 6, the registrant indicated that it is qualified facility and has attached a copy of a FERC registration but failed to provide a copy of its FERC registration. In response to Part C question number 9 (Interchange Project Number where registrant's Emergency Operation Plan is filed and Item Number of filing) the registrant failed to provide an answer. Commission Staff respectfully requests the presiding officer to issue an order requiring the registrant to clarify its response to Part B - question 6 and Part C question 9 and file a revised PGC application in - 57906.
