Mr. Ken Plumb
Secretary of F.E.R.C.

Washington, D. C. 20426

Dear Mr. Plumb:

This letter is to serve as notice that Snider Industries, Inc. of Marshall, Texas is installing a boiler-turbine-generator plant and will be engaging in co-generation.

Snider Industries is a lumber manufacturing firm located in Marshall, Texas 75670 on Loop 390. We are installing a 60,000 lbs/hr 600 psig with 750° F boiler which will be fueled with wood residue consisting of bark and sawdust.

We are installing a General Electric 2500 KW extraction turbine which will cover our plants electrical needs. We plan to cover our process heat requirements for our dry kilns by extracting 50 lb steam from our turbine. This requirement is approximately 15 million BTU per hour.

Since our plant operates two (8) hour shifts, (5) days a week, and our dry kilns operate (24) hours per day, (7) days a week, it is necessary that we operate our boiler plant on a (24) hour basis; and since we must operate our turbine-generator also, we will be selling approximately half our KWH output to the local utility. This installation, on an annual basis, will produce 21 million KWH per year, and of that amount, we will use 10 million KWH per year and will sell the excess 11 million KWH to Southwestern Electric Power Company.

May we request an acknowledgement of this letter, so that our local utility company may have a copy for their files.

If you need any additional information, please do not hesitate to contact me.

Very sincerely,

Ronald L. Snider
