REASONS FOR NOT APPROVING THE PROPOSED RATE CHANGE

PUBLIC UTILITY COMMISION OF TEXAS - DOCKET 58124

INTRODUCTION:

I just received on June 19th the documentation sent by AQUA TEXAS via physical mail under the title "NOTICE OF PROPOSED RATE CHANGE".

Over the past few weeks, since March 23, I have presented to the PUC my complaints and calculations regarding DOCKET 57784 "Application of AQUA TEXAS, Inc for 2024 True-up Report and Pass-Through Gallonage Charge for its Southeast Region", questioning situations, information and data from Revenues, Production and Consumption that appear in their own documents and that affect the cost of water billed to users, without having obtained any clarification from AQUA TEXAS in this regard. Just now, on June 18th, AQUA TEXAS is sending a RATE Modification that makes the water consumption an unfair expense and unaffordable for many Subdivision neighbors.

STATEMENT OF FACTS:

1.- CHARGES COMPARISON BETWEEN AQUA TEXAS EXISTING AND NEW RATES

In order to get a congruent comparison between the actual rates and the new rates, the consumption shown in the AQUA TEXAS invoices to customers have been used. A selection of invoices and its consumptions <<see invoices attached>> that look realistic for different annual seasons for a household of 4 persons are attached at this document, to avoid any doubt as to the quantities and charges:

July 17TH 2024 - 11,000 gallons
June 17th 2025- 5,900 gallons
May 15th 2025 - 2,800 gallons

AQUA TEXAS - NEW RATES

| | | | | |
|---|--|-----------|-----------|-----------|
| Date: 6/27/2025 | | | | |
| Meter Size: 5/8" & 3/4" | | | | |
| Client: | | | | |
| Address: | | | | |
| | | | | |
| Date of Bill: | | 7/17/2024 | 6/17/2025 | 5/15/2025 |
| Total Water Used (just put the amount from the bill): | | 11,000 | 5,900 | 2,800 |
| | | | | |

EXISTING RATES Vs NEW RATES COMPARISON

| | | | |
|---|---------|---------|---------|
| Charge Difference between Existing Rates and New Rates: | \$49.48 | \$35.73 | \$27.93 |
| Percentage of Increment between Existing and New Rates: | 123.41% | 122.91% | 121.30% |

(A detailed calculation of this chart is included under the Attachment: LABO Comparison between Actual Rates and New Rates (Docket 58124))

As it can be seen the Rate Increase is not less than 21%, for any of these invoices, with an average of 22.5% among the three, in addition that the current rates are already very high.

2.- CHARGES COMPARISON BETWEEN AQUA TEXAS AND MUD’S SURROUNDING

As it can be seen in the Maps attached:

- BLACK OAK System Location
- MUDs within 2 miles Buffer
- MUDs Location at WOODLANDS
- Detail BLACK OAK System location related to MUD Districts

Lakes at Black Oak Subdivision is surrounded by MUDS whose existence predates the beginning of LABO development. MUD-36, MUD-46, MUD-60, MUD-137 AND MUD-386 all of them within the "TWO MILES BUFFER" and some being at less than half a mile, straight line.

Lakes at Black Oak Subdivision could have been connected to some of these MUDs reliant on the Montgomery County or Harris-Montgomery County Districts, which as seen in the maps, border LABO Subdivision. The decision of the Developer (150 CCM Black Oak, Ltd) to sign an agreement with AQUA TEXAS to build a New Water System has proved to be expensive and inefficient, and right now, we, the customers are suffering extremely high charges and poor service from the water provider: "System that has to flush the hydrants very often" <<perhaps once a month, to remove sediments, while "The Woodlands Water" does it once a year>> incrementing the water production not consumed and for that reason the losses that at the end are charged to the clients; along with a poor customer service.

An analysis of the charges to neighbors of different MUD's that border our utility: BLACK OAK WATER SYSTEM, has been done for their consumption or for the selected consumptions shown at point 1 and the results can be seen in the different attachment for each one of the MUDS:

- MUD 36 Actual Rates Vs AAUQ TEXAS New Rates (Docket 58124)
- MUD 46 Actual Rates Vs AAUQ TEXAS New Rates (Docket 58124)
- MUD 60 Actual Rates Vs AAUQ TEXAS New Rates (Docket 58124)
- MUD 137 Actual Rates Vs AQUA TEXAS New Rates (Docket 58124)
- MUD 386 Actual Rates Vs AQUA TEXAS New Rates (Docket 58124)

From the previous analysis I have compared the results in "Dollar Value" and "Percentage" for the New Rates Vs. Actual Rates for each one of the mentioned MUD's:

RATES COMPARISON BETWEEN LABO AND MUD'S

Date: 6/27/2025
Rev: 0

| Water System | Consumption Gallons | WATER \$ | SEWER \$ | SIC+RPTG, GRP or NHCRWA FEE | TOTAL \$ | New Rates Relative Cost at Equal or Equivalent Use |
|--|------------------------|-------------|-------------|--------------------------------|-------------|--|
| LABO - 2025 NEW RATES | 11,000 | \$117.37 | \$96.93 | \$46.55 | \$260.85 | |
| | 5,900 | \$69.81 | \$96.93 | \$24.97 | \$191.71 | |
| | 2,800 | \$50.29 | \$96.93 | \$11.85 | \$159.07 | |
| MUD 60 | 11,000 | \$65.92 | \$70.65 | | \$136.57 | 191.00% |
| | 5,900 | \$35.73 | \$39.29 | | \$75.01 | 255.57% |
| | 2,800 | \$18.64 | \$20.22 | | \$38.86 | 409.39% |
| MUD 36 | 11,000 | \$73.08 | \$79.63 | | \$152.71 | 170.81% |
| | 5,900 | \$40.95 | \$47.35 | | \$88.30 | 217.12% |
| | 2,800 | \$23.14 | \$27.72 | | \$50.86 | 312.77% |
| MUD 46 | 11,000 | \$67.42 | \$76.81 | | \$144.23 | 180.86% |
| | 5,900 | \$37.23 | \$42.59 | | \$79.82 | 240.19% |
| | 2,800 | \$20.14 | \$21.79 | | \$41.92 | 379.43% |
| MUD 137 | 11,000 | \$24.50 | \$51.58 | \$31.79 | \$107.87 | 241.82% |
| | 5,900 | \$15.00 | \$51.58 | \$14.45 | \$81.03 | 236.59% |
| | 2,800 | \$15.00 | \$51.58 | \$8.09 | \$74.67 | 213.03% |
| MUD 386 | 11,000 | \$13.91 | \$16.00 | \$31.46 | \$61.37 | 425.04% |
| | 7,000 | \$9.27 | \$13.00 | \$20.02 | \$42.29 | 453.32% |
| | 4,000 | \$7.21 | \$11.00 | \$11.44 | \$29.65 | 596.50% |
| % LABO NEW RATES OVER AVERAGE MUD's RATE | 11,000 | 239.70% | 164.47% | | 216.38% | |
| | 5,900 | 252.62% | 250.06% | | 261.58% | |
| | 2,800 | 298.95% | 366.29% | | 337.07% | |

As it can be seen the difference in Consumer Charges it's awful with differences up to Five times if we compare with the MUD 386 and an Average more than twice if we consider the Average of all the MUD's

Only the "Minimum Monthly Charge" for Water and Sewer <<See Attachment: LABO Comparison between Actual Rates and New Rates (Docket 58124)>> which totalize \$131.83 dollars (\$34.90 + \$96.93) for 0 gallons consumed at LABO is higher than most of the 11,000 gallons, and way above the 7,000 and 5,900 gallons consumed charges at the different neighboring MUD's.

3.- CHARGES APPLIED

According to Page 3 of the Mailed Document, the number of Utility Customers to whom this Proposed New Rates is intended to apply is 78,970 people – your 10% is 7,897 ratepayers needed for the matter of the document to be set for hearing.

According to page 3 of the document sent, AQUA TEXAS intends to "RECOVER CAPITAL INVESTMENTS" with an annual Revenue Increase of \$17,784,500 dollars in Water and \$11,364,116 dollars in Sewer, a Total of \$29,148,616 dollars, in order to "RECOVER CAPITAL INVESTMENTS TO MAINTAIN AND IMPROVE ITS SYSTEMS SINCE THE LAST CASES". In the same page 3 say that the "Date of Last Rate Change" was March 1st 2024, which tells me that in 18 months AQUA TEXAS has made said investment and maintenance:

If we divide the total amount that AQUA TEXAS intends to recover by the number of people who receive their service, which is 78,970, to each of them corresponds the amount of \$369 dollars and if we consider that part of this will be used to recover the investment made, the increase in bills should not exceed \$30 dollars/month per consumer assuming an operation and depreciation time of one year which should be less because the depreciation is done through a longer period of time, perhaps 10 years.

We are seeing that only in the concept of "Monthly Minimum Fee" adding both, water and sewer, the increase has been \$37.03 dollars ($131.83 - 94.8 = 37.03$); with the simple increase of the "Monthly Minimum Fee" it should be enough without the need to vary the rest of the charges. Although I don't personally approve the increment of the minimum monthly fee, this leads me to present that the changes in the rates respond to the inefficiency and lack of productivity of AQUA TEXAS in its operations and administration.

4.- INCLUSION OF THE REGIONAL PASS-THROUGH GALLONAGE CHARGE AT DOCKET 58124

According to AQUA TEXAS' own documentation in a previous docket: [REDACTED], <<AQUA TEXAS knows the DOCKET I am referring to>>

The purpose of this true-up/adjustment provision is to true-up and adjust Aqua Texas' authorized Regional Pass-Through Gallonage Charge each year in an effort to provide the best opportunity for regional revenue collected from the charge to align with certain types and amounts of pass-through costs Aqua Texas has incurred in the preceding year for the region using a process that does not require the expense of a full rate proceeding.

For this reason, the RPTG Charge recently proposed in DOCKET 57784 and already assigned <<see pages 5 to 19 of the DOCKET 58124>> should be eliminated if it happens the new rates are applied; since the costs related to the RPTG Charge must have been included within the New Rates. *The intention of the*

Pass-Through is to avoid the expense of a full rate proceeding, although it has nevertheless been included in this docket in discussion.

And even more, it turns out that in this DOCKET 58124 - Page 31 <<Code PT-SE4 and PT-SE5>>, there are Subdivision that have not that charge applied in the New Rates. (See following table extracted from the information presented by AQUA TEXAS to PUC at DOCKET 57784, and origin of its calculations):

| Aqua Texas SE Region - 2024 RPTG Revenue-Production-Consumption Data | | | | |
|--|---------|----------------|----------------|-------------------------|
| SE (Group) | | Production | Consumption | |
| System Name | PWS # | x 1000 Gallons | x 1000 Gallons | |
| BARROW RANCH | 0360122 | 25,691.300 | 24,428.000 | N/A Pass-Through Charge |
| CARRIAGE TRAIL SUBDIVISION | 0360093 | 1,649.000 | 1,502.300 | N/A Pass-Through Charge |
| HACKBERRY CREEK SUBDIVISION | 0360100 | 5,555.900 | 4,802.300 | N/A Pass-Through Charge |
| LEANING TOWERING OAKS SUBDIVISION | 1460145 | 14,601.200 | 4,694.991 | N/A Pass-Through Charge |
| OAK MEADOWS SUBDIVISION II & III | 1460100 | 2,684.000 | 4,648.600 | N/A Pass-Through Charge |
| SUNCHASE SUBDIVISION | 1230083 | 3,003.600 | 1,371.200 | N/A Pass-Through Charge |
| TRINITY COVE SUBDIVISION | 0360084 | 2,552.100 | 1,987.200 | N/A Pass-Through Charge |

The Total Water Production of the Seven Subdivision is: 55,737,100 gallons

The Total Water Consumption of them is: 43,434,590 gallons

Although it does not correspond to this DOCKET 58124 but given that the information has been discovered in it, I want to point out: These seven Subdivisions that do not have any charge for RPTG, according to Page 31 of said DOCKET, while their production and consumption has been considered in the RPTG calculations within DOCKET 57784, leads me to assert that said calculations are erroneous and are affecting the final result of DOCKET 57784.

These Production and Consumption Quantities are big enough to disqualify the Regional Pass-Through Calculations made by AQUA TEXAS at DOCKET 57784 with Subdivisions without RPTG Charge and water loss of 68% or 54% and are affecting the rest of the Region.

QUESTIONS AND REASONS FOR REQUESTING THE CANCELATION OF THE PROPOSED RATE CHANGE

- Why were AQUA TEXAS and the Developer so much interested in reaching an agreement in the Subdivision beginning?
- Why the reason of the agreement if they knew they wouldn't be able to compete with the neighboring MUDs?
- Is it because the neighbors are "Captive Clients" that can't search in the neighborhoods for a New Water Supplier?
- Why didn't allow HMCMD to give the water service to LABO as another MUD, or is there any other reason? At least the economic benefit would go to the Municipality.
- What is the purpose of AQUA TEXAS submitting a change to the Regional Pass-Through Gallonage Charge under DOCKET 57784 and simultaneously requesting a rate change under DOCKET 58124?
- Isn't it clear the Extremely High "Overcharge" of AQUA TEXAS in the Proposed Rate Change related to the neighboring MUD's?
- Was the Existing Rate competitive with the neighboring MUD's all these past years? In my opinion the differences shown are not only from 2025 new rates, it has always been this way.
- How can a 22.5% rate increase over the existing one can be proposed, when the inflation rate is of 2.5%?

- i) Is for this reason that AQUA TEXAS has to advertise itself, at least in our BLACK OAK Community, sending through the mail the attached flier, which is no more than a slap to the neighbor's wallet? Is it to sell us the Increment of the 22.5%? (See attachment AQUA TEXAS Advertise Mail)
- j) Aren't these differences in rates with the bordering MUD's, all these past years, hadn't allowed them more than recover the initial investments?
- k) How efficient, in administration and production, can a company be if its proposed rate increase is 260% higher than that of neighboring companies? See Point 2
- l) Why is it included the charge for a Regional Pass-Through (RPTG) in the New Rates when the intention of the RPTG is, clearly mentioned by AQUA TEXAS: *"to avoid the expense of a full rate proceeding"*? Shouldn't have to be removed from the New Rates?
- m) Why if, as show at the Point 3, the need to recover \$29,148,616 dollars with 78,970 people represents a charge of \$30 dollars/month per consumer have to raise the rates the 22.55%.
- n) The cost of the LABO installation was already defined, between Developer and AQUA TEXAS, from the very beginning of the Subdivision and the investment on it was well know and expenses agreed with the Developer. Why now do they want to charge this investment to the customers, as mentioned in the **Section I)**?

Since the Subdivisions residents can't search for another Water Utility but AQUA TEXAS, a Private Corporation, instead of a MUD, I request to the **PUBLIC UTILITY COMMISSION of TEXAS**:

- A As "Captive Customers" of AQUA Texas, we are defenseless against their actions.**
- B To protect us from AQUA TEXAS's abuses as it has been shown.**
- C That the DOCKET 58124 - PROPOSAL OF NEW RATES SHALL NOT BE APPROVED**

An  Essential Utilities Company

Investing in Black Oak for Generations to Come

For the first time in 20 years, Aqua Texas has filed a statewide rate case with PUC of Texas to adjust base rates. During that time, Aqua Texas has invested significantly in upgrading and replacing infrastructure in your community to ensure safe, reliable water service. These critical capital improvements have enhanced system performance and customer experience, and the proposed rate adjustment reflects the value of those long-term investments.

In the Black Oak system, Aqua Texas has invested
\$6 million.

Here are some projects that took place in Black Oak:

- Construction of a new well to increase water availability and system reliability
- New booster pump facility to ensure reliable service
- New booster pumps to increase water pressure
- Upgraded electrical system to ensure reliable service and increase resiliency
- New ground storage tank to improve system reliability and resiliency

These investments are part of Aqua's ongoing commitment to delivering high-quality, reliable service every day. While the proposed rate adjustment reflects the cost of these essential improvements, it also ensures we can continue building and maintaining the infrastructure our communities depend on—now and for generations to come.

One-half inch, twice per week.
The average homeowner puts 43% more water on their lawn than is needed. All your lawn needs is 1 inch of water per week. Depending on how much rain we get in the area, there may be weeks when you don't have to water your lawn at all! That amounts to huge water savings and a reduction in your monthly water bill.
