Aqua Texas remains in **violation of permitted water production per household** and, to date, **has not presented a formal plan to resolve this issue**. These ongoing violations have now led to **Stage 2 water restrictions**, which are expected to escalate as we move further into the summer months.

We have had an enormous amount of rain this year and to be on a level two restriction already is ridiculous. Aqua has been promising us for 20 years according to our board minutes that they were going to adequately supply our neighborhood and they are currently minimally, providing the lowest level possible for our neighborhood. 2 tanks have been approved (1 in 2025 and 1 in 2026) with no action on their part.
