To Whom it may concern,

I am writing in objection to PUCT Docket No. 58124 submitted by Aqua Texas.

I recently received the Docket packet in the mail stating that Aqua Texas is requesting to raise our rates 3 times what we are paying now. **WHY?** I have lived in this subdivision for 6 years now and this shocked me! I have provided an example of my last month's water bill.

4/30/25 to 6/2/25 from Aqua Texas

Water consumed 37,200 gallons of water.

Presently paying \$3.70 per 1000 gallons of water. $37.2\text{k gallons} * \$3.70 = \137.64

Docket proposal \$15.12 per 1000 gallons of water. $37.2\text{k gallons} * \$15.12 = \564.46

Annual water usage is approximately 24,000 gallons per month. The rate has always been \$3.70 per 1000 gallons!

This is a 3 times rate increase! How is it that Aqua Texas can change its rates so drastically?

What is the reason for such an outrageous increase?

Regards,
Roy A. Grichuk
