Re: Docket No. 58306 — Application of Oncor Electric Delivery Company LLC for Authority to Change Rates

To Whom It May Concern,

I am writing as a Texas resident and Oncor customer to formally oppose Oncor Electric Delivery Company LLC's recent request for a significant rate increase.

With the cost of living at an all-time high and wages not keeping pace with inflation, many Texans are already struggling to keep up with essential expenses. Adding yet another increase to our monthly utility bills at this time is unreasonable and burdensome for working families.

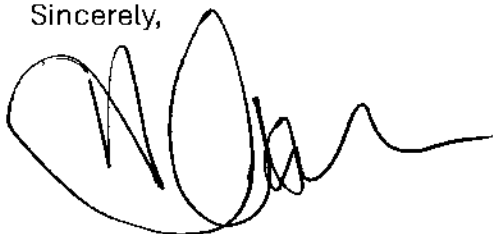

Furthermore, it is deeply frustrating to see Oncor requesting more money when the reliability of our electric grid remains questionable. Rolling blackouts and grid instability have become all too common in Texas, and Oncor has not demonstrated an ability to consistently deliver reliable power, especially during extreme weather events when residents need it most.

If Oncor wants higher rates, Texans deserve to see clear evidence that the company can provide the dependable service we pay for — and right now, that trust is not earned. It is unacceptable to ask residents to pay more when the basic delivery of electricity remains unreliable in critical times.

I respectfully urge the Commission to reject this request or require Oncor to first demonstrate measurable improvements in grid capacity, reliability, and customer service before approving any increase in rates.

Thank you for considering my comments on behalf of myself and other hardworking Texans.

Sincerely,

A handwritten signature in black ink, appearing to read 'Heather Casebeer', with a long horizontal flourish extending to the right.
